Captain Rokins of the British ship Merloneth seems to be playing in hard luck. He was put in quarantine because he came from an infected port, had to throw over all of his ballast and then go through the disinfecting process before he could dock his ship. Now he does not know what to do with one of his crew. While the Merioneth was at Rio de Janiero a Chinese carpenter was shapped, and it is this Mongolian who is causing all the trouble. The ship is in the stream, but will probably dock today. Once alongside a guard will have to be placed over the Chinese, for if he escapes Capt. Rollins makes himself liable to a fine of £00 under the McCreery exclusion act. The skipper wants to send the coolle back to China on the Gaelic today, but the fatter refuses to go. He insists upon being taken to England and from there sent to China. The British consul has the matter under consideration and the chances are that some solution of the problem will be reached today.—Call.

have just been erected at Indio stahave just been erected at Indio sta-tion, that will be rented to applicants at reasonable rates. They are fur-nished with modern conveniences, sup-piled with pure artesian water, and so situated as to gove occupants all the advantages to be derived from a more or less protracted residence in this de-lightful climate.

(From the San Francisco Argonaut.)

"In the heart of the great desert of the Colorado—which the Southern Pacific road traverses—there is an oasis called Indio, which, in our opinion, is the sanitarium of the earth. We believe, from personal investigation, that for certain invalids, there is no spot or this planet so favorable."

G. T. Stewart, M. D., writes: "The purity of the air, and the eternal sunshine, fill one with wonder and delight.

"Nature has accomplished so much that there remains but little for man to do. As to its possibilities as a health resort, —here is the most perfect sunshine, with a temperature always pleasant, a perfectly dry soil for rain is an unknown factor; pure oxygen, dense atmosphere and pure water. What more can be desired? It is the place, above all others, for lung troubles, and a paradise for rheumatics. Considering the number of sufferers who have been cured, I have no hesitancy in recommending this genial oasis as the haven of the afflicted."
