tendance rolls were kept up at most institutions, so that instead of showing a decline in years of panic and depression they continued to show almost if not quite their normal increase. Nor was that because college students are as a rule so wealthy as to be above the ef-fects of hard times. They are not. The vast majority of them come from families of moderate ar even slender means. The keeping up of college attendance in hard times, therefore, means that Americans times, therefore, means that Americans do not propose to begin economies and re-trenchments at the head. They may, in

an emergency, wear plainer clothes, eat plainer food, and forego many things, but they will not starve the mind. What-ever else may be or may not be done, the boys and girls must be kept in col lege. So the growth of the college army continued unchecked through the lean ever been proposed in congress. This i believe to be true, not only because of its importance from a commencial point of view, but because of its use as a means of defense. "The opening of the canal, by giving
