ALONG THE WATER FRONT.

J. W. Harrison's last San Francisco coal report says: During the week there here been nine arrivals from British Cohumb/a with 22,913 tons of coal, from Newcastle, N. S. W., 12,834 tons, from Swansea 3,103 tons. These amounts agby a large bunting party. Yessterday four more bears were discovered in the woods near Ettrick. The community about there is considerably excited. Where the ebars come from is a question. It is probable that the shagey bears seen there of labe have wandered down from the northern part of the state in search of better randons.

Turna is no change of value perceptible, as we are assured a bounteous supply of each this winter, and our targe consumers have all contracted under requirements into next year. Our principal sources of supply are New-Castle, N. S. W., and Swansea, Wales; here of fore Swansea anthracite did not heretofore Swansea anthracite did not meet with much favor as steam producer until this year. In former years its principal consumers were the gas pro-ducers; now it is a growing fuel with the manufacturers. Anthracite has been favored by the tariff reformers by being placed on the free list, why or wherefore "is one of them questions no follow can answer" unless a Washington sage. The anthracke product culls for more pro antifaction in the United States thin its blu-minous output, yet the former is admitted free, and the latter is weighted down with 40 cents per ton duty. The writer has always been a consistent advocate of all coal being free of duty, as the duty has been the deathknell to so many of our local factories that have Eastern competition. Consistency is a level, let us have a duty on all foreign coals, or udmit them all free A little more than three years bay

parsed cince the proud German fivemaster Muria Rickmers started from an English port on its first voyage, from which it never returned. It disappeared without tenving a trace. Only on stages of Communition, and in all the ing verses of similar dimensions has bee conditions that lead to it, Dr. Pierce's built since (we refer to the French five ing vesset of similar dimensions has been markably quick voyages with other ves media trustal A German sulcon keeper, who lives in enjoys a very high reputation for ability It has a capacity of 6,150 tons, or 550 tons more than that of La France. The uninitiated may obtain a better idea of the geat size of this vessel from the following figures: 5,511,500 pounds of iron were used in its construction, and the versel, which will make regular trips to the western coast of South America for sufficiency, can correy about 13,227 bags of sa. For the transportation of the same quantity by raff 600 double cars would be required, which, if coupled together, would make a train more than three miles long. The Potost carries 33 sails that are made of canvas nearly two feet wide, and if all of these pleces of can make a strip nearly one and one-half miles long. The vessel can carry as miles long. The vessel can tarry as many people us there are in a city of the size of Bremen. The Potosi excels other rathing vessels not only in size, but in elegance of its construction and fitting. The Marka Rickingers was built in an Entire was a way have said, the Pogirli yard, but, as we have said, the Poicel was constructed in Germany and is a specimen of shipbuilding of which al-Germans may well be proud. May good fortune attend her in all her voyages!-Don brinte Zehtung
