ECONOMY IN FUEL.

The Euroka Fuel Economizer is a sci-entifical preparation which augments the intensity of coal and wood heat in the

proportion of E per cent.

If the direction printed on each package is carefully observed, the Eureka Coal Economizer will give to any ordinary or midding coal the same value as that of superior quality.

The Eureka Fuel Economizer prevents the shoots, the cinders and the formation of smoke, which may spoil, in an apart-ment, so many valuable articles, such

ment, so many valuative articles, such as curtains, paintings, etc.

The Euroka burns any kind of gas which might destroy the breatfastic air; apartments and factories in which it is used are consequently more healthy and comfortable. In less than five minutes, one can obtain a very brisk fire which will last thirty hours without being stirred up and without any addition of fresh coal. Hence an economy of coal, work and money.
