operation." What we do know may be summed up in a few words. In storms immense masses of air gyrate about a vertical or nearly vertical axis, drifting eastward, and at the same time drawing in warm easterly currents at the front and cold westerly currents at the rear. As these currents meet in the upper regions of the atmosphere they generally, but not always, cause a precipitation of rain or snow. But, on the other hand, heavy downpours of rain often occur without Rocky mountain region condensation portion of the storm area, where the cold north and west winds are flowing in, flowing toward the storm center. Thus a comprehensive survey of the current

theories of meteorology leads to the conclusion that we have thus far only scratched the surface of the science, and that our forecasts of the weather, however skillfully made, are nothing but guesses, which are almost as likely to be erroneous as to be correct. Still, it is something to know that the The Small Boy Was Under Excellent drift of the air on this continent is gen-

That is probably the case all over the world, but the from west to east, like our storms on this coast, the prevailing wind during a storm destructive storms which occur on this part of the coast come from the ocean; but they are quite frequently heralded blow from the east as from the west.

For five years, I had on both my legs three very bad ulcers, two on one, and one on the other just into the bone above the ankle, as large as a five cent piece, which hatt me so much night and day, that I could not sleep for the itching and burning. I had to get up three or four times a night. Did not know what to do with myself as I could not work. Called a doctor, but he did me no good, and in all, had six of the best doctors I could get, but they could do nothing, and I gave up all hopes of ever getting cured. Nothing did me any good, until I tried CUTICITA KESTIDIES. The first application, the itching, smarting, and burning stopped. I kept on with them, and in three months was entirely cured. Fire years I suffered, and can prove it by people where I now live. If anyone doubts this, write to me, and I will tell them with the greatest of pleasure, what CUTICUTA REMEMBERS have done.

They Lack Life There are twines sold to fishermen on the Columbia river that stand in the same relationship to Marshall's Pwine as a wooden image does to the numan being-they lack strength-life -evenness-and lasting qualities. Don't fool yourself into the belief that other twines besides Marshall's will do "just as well." They won't. They cannot.
