Such services should not

go unnoticed, and such a record of bravery and devotion to a cause should be highly appreciated. Ther has been a more active movemen in the local wheat market during the week under review. The feeling generally is firmer, and more confidence is felt that prices will advance by degrees. Val-ues have appreciated slightly, but there are some interior holders who think that they will advance much further by the turn of the year, and that the advance has not kept pace with the improvement abroad. Foreign advices have been firmer, sellers are offering wheat here more free-ly, and at no time since the beginning of the present cereal year have offerings been so liberal. Receipts are much larger and warehouses are filling up. Exporters are paying for Walla Walla 51932c per bushel, and for Valley 53%c. They are only willing buyers when grain can be bought at or near the market value, and having no present need of wheat or any As Franklin says, good dress opens ill doors, you should not lose sight of the fact that a perfect fitting suit is the main feature. Wanamaker & Brown are noted for fit, workmanship unfilled engagements, there is no competition, and bids placed represent the actual basis of export value. There are holders who refuse to sell even at these figure-claiming that the late improvement i foreign and Eastern markets have en-couraged them in holding, and it seems that any extra firmness abroad at mu'a e sellers in either holding aloof or asking figures which, if paid, would represent considerable of a loss in floating cargoes at present freight rate and selling prices abroad. Though exporters are paying 2c to 2c per bushel higher than a week ago, it would seem as if the majority of the crop of Oregon and Washington would

NEW PHOTOGRAPHIC IDEA.

Process Discovered for Making a Print That Resembles a Line Engraving

Herman E. Mendelszohn has discovered

applied to a sheet of photograph paper which is next sensitized by immersion in a special bath. These films are exposed

to light under the negative, the exposur being timed by an actinometer.

An ordinary negative is then taken and coated with a solution of turpentine and resin. This negative is immersed in cold

water and then brought into optical con-tact with the printed relatinous film. The result, after various intermediate processes, is a compound negative, from which the novel pictures may be printed

It is significant that at a mass meeting of Germans at Springfield, Mass., last Wednesday, the speeches and resolutions were vigorous in denunciation of the American Protective Association.—New York Post

A GOOD WORD.

Mr. J. J. Keil, Sharpsburg, Pa.
Dear Sir' I am glad to say a good
word for Krause's Headache Capsules.
After suffering for over three years
with acute neuralgia and its consequent
nsomaia (which seemed to haffle the
efforts of some of our best physicians)
you suggested this remedy which gave
me almost instant relief. Words fail
to express the praise I should like to
bestow on Krause's Headache Capsules.
Gratefully Yours,
