## ECONOMY IN FUEL.

The Eureka Fuel Economizer is a scientifical preparation which augments the intensity of coal and wood heat in the proportion of 21 per cent.

If the direction printed on each package is curefully observed, the Eureka Coal Economizer will give to any ordinary or middling coal the name value as that of superior quality.

The Eureka Fuel Economizer prevents the shoots, the cinders and the formation of smoke, which may spoil, in an apartment, so many vacuible articles, such as curtains, paintings, etc.

The Eureka bures any kind of gas

which might destroy the broathshie air; apartments and factories in which it is used are consequently more healthy and comfortable. In less than five minutes, one can obtain a very brisk fire which will last thirty hours without being strred up and without any addition of fresh coal. Heree an appropriate the coal of the coal Hence an economy of coal, work and money.

The Eureka Economizer produces a heat

more nort and more concentrated; when a normal heat is wanted, the ventilation must be partly stopped and, again, an sconomy in fuel is to be reited upon. BE THOROUGH.

Many persons seem always to be in a hurry, and yet never accomplish much; others never seem to be hurried, and yet do a very great deal. If you have 50 let-ters to answer, don't waste too much time in looking over to find which one should be noticed first; answer the first one you lay your hands on, and then go through the pile as fast as possible.
