# THE MODEL EMPLOYDR.

Many solutions of the problem of har-monizing capital and labor have been proposed, such as profit-sharing, mutual benefit associations, pension funds, joint

tion for St. Valentine's day. Most strik-ing among the contents is a profusely diustrated article on the famous museum Cleveland Moffat tells some of freaks. reaks. Cleveland Moffat tells some of the richest stories about the late Eugene Field, and among the interesting articles are "Studio Life in Paris," "What the Bicycle Does for the Muscles," and a description of how the deaf are taught queech and speech reading. In the series on "Music in America," which is a dis-

and successful feature of incritize and successful feature of Godey's, Rupert Rughes writes entertain-ingly on the subject of cantains, and dis-cusses Mr. G. W. Chadwick's works. Under the head of "Talks by Successful Women" appears an interview with Mrs. Dunlap Hopkins, who has accomplished so much for women in New York and

isowhere. The fiction of this number is unusually strong and abundant, including a farcical spook story by Tudor Jenks, and an In-tenue romance by Rohert C. V. Meyera. The customary fashion department completes an unusually attractive number.

There are degrees and kinds of poverty, just as there are differences of opinion among those who compute and measure poverty by different standards. Some men deem themselves poor because they are less rich than others, again, there are comparatively poor people who are satisfied with a competence. There is a kind of poverty for which no amount of wealth can compensate, namely, a pov-erty of bedity stamina, evinced by ner-vousness and a derangement of the func-tions of digention, billious secretion and the howards.
