SHIPPING DAY BY DAY

Marine Matters, Here, There and Everywhere.

The steamer Occident is still on ways at the Dalgity Iron Works. The bar was obscured all day yesterday

he wind averaging about ten miles per

hour. No vessels passed in or out.

The steamer Alice Blanchard, after discharging cargo at this port, left up for Portland Monday night. She will proba-bly be down on Priday.

There are at present twenty-four ves-els en route for this port, with a total conage of 25,120. This includes the long wordue Cadgow Forest.

The bark Pactoins, 1385 tons, which is now at Portland, has been chartered to take a cargo of sugar from Honolulu to New York. The charter price is \$5.75. The steamer Elmore went down to the

mouth of the river yesterday, but owing to the heavy for and the troubled con-dition of the waters, did not cross out. The British ship Yarana, which arrived in Sunday, is lying in the stream opposite the O. R. and N. wharf. She arrived too late to save her charter, and will remain at this port until ordered elsewhere.

During the heavy blow Monday night, the British ship Bedfordshire, which was anchored off Hustler's wharf, dragged her anchor, and at present is lying off Elmore's cannery. Until the present bad weather moderates, she will lie in the

as missing, and the reinsurance on her will have to be paid.

Forty per cent re-insurance has been offered in San Francisco on the Cadzow Forest. Thirty-one days have elapsed since the vessel was blown from the river's mouth, and the greatest anxiety is felt for her rafety in San Francisco. Twenty-one days is the longest time a vessel has been blown off the bar and afterwards arriving safely.

The Puget sound waters by the establishment of a lighthouse at Clailam bay, 20 miles cast of Cape Flattery. Clailam bay is a harbor of refuge for all classes of vessels, who find there good anchorage and safety during atorms. During the present winter (1855-96) Clailam bay has sheltered nearly a hundred vessels, whose a sugregate value would be many millions of dollars, with crews numbering hundreds of men.

We submit that a lighthouse ought to be placed at that harbor to guide vessels.

big liner was kept under a full head of steam, and after a vain attempt to catch her the doctor got angry and went to the steamer Wellington, which was passing in from British Columbia. After passing upon her bill of health Dr. Chalmers went to the Rio de Janeiro. The only cabin plasengers by the Rio were Kenead Buxton, M. Fumakotashi and wife. Rev. H. B. Price and J. K. Eveleth. M. Fumakotashi is the new vice consult from Japan to San Francisco. He was recently curried to the daughter of one of the major sentrals who conducted the war against China. The Eastern malle that came by the steamer missed the overland train and will have to wait for today's express, thus losing twenty-four hours. J. W. Harrison's coal circular contains ASTORIA IRON WORKS General Machinists and Boiler Makers John Fox. President and Spregintendent O. B. Prael.....Secretary

Gentlemen:—I had occasion to use several boxes of Krause's Headache Capsules while traveling to Chicago to attend the National Democratic Convention. They acted like a charm in preventing headaches and dissiness Have had very little headache since my return, which is remarkable. J. W. Harrison's coal circular contains the following: During the week there have been eleven arrivals from the coast have been eleven arrivals from the coast mines with 21,124 tons, from Swansca 5,787 tons. The moderating of the weather has led to a falling off in consumption of domestic coal this week, still retailers cannot complain as they had a brisk trade for several weeks. Quotations remain unchanged, although there is a disposition on the part of importers to flit orders for future loading at less figures. There has been no accumulation of stock in yards this month, except Swansea, of For sale by Chas. Rogers, Astoria, n yards this month, except Swansea, of which there is considerable in store, but in view of there being only about 15,600 tons that can possibly arrive here in the next four months, and the amount con-numed will be fully double that quantity, hauce about June text there will be only a moderate quantity here. The accumus-lation of tonnage in the Australian waters indicates large imports from that section

this year, and at prices that will doubt-less lead to a largely increased demand for those grades over 1895. Swansea an-thracite has lately been the popular coar for steam uses, but it will have a for-midable competitor in Newcastle, N. S. midanic competitor in Sewcaste, S. W., as the variance in price will be largely in favor of the latter. The difference in the coat of loading these two characters of coal today is % cents per ton in favor of Australian—S. F. Commercial.

With the approach of the spring seas there are indications that the travel to-ward the Alaska gold fields will be larger than ever before. The results from last season's work were sufficiently encouragseason's work were sufficiently encouraging to draw back to the gold regions all those who came down for the winter and many hundreds in addition. In anticipation of the spring and summer rush, Captain J. A. Hatfield, since his return from Europe, has given the Alaska business a very thorough examination and has determined to put on a line of sailing vessels, in number as many as the demands of the new trade will warrant, and the initial trip will be made from Seattle on or about March 15. The Cook Inlet Transportation Company has been organized and the staunch little schooner Ella Johnsen, Captain Smith, of about 150 tons, will clear on the day mentioned. The Ella Johnsen will have accommodations for about 75 passengers, besides The Elia Johnson will have accommoda-tions for about 15 passengers, besides freight, and ought to make the round trip in about sixty days. She will be dispatched for Six-Mile creek, Cook in-let, cailing at Kodlak, and will no doubt be the forerunner of quite a little fleet of vessels called into service by the growing demands for transportation for what is fast becoming one of the most famous mining regions on the coast. Captain Hatfield, who has established the company's offices in the Roxwell building. company's offices in the Roxwell building, predicts unusual activity in the trade be-tween Puget sound and the Cook inlet during the summer, and the new comduring the summer, and the new company is making preparations to handle their share of it. The Eila Johnson is now being strengthened and put in good seaworthy condition at Ballard, under Captain Hatfield's direction, but the repairs upon her will be finished in season to allow of her sailing about the middle of March.

M. Lemaitre, the new French Academican, is the son of a peasant school-master, and he was designed for the priesthood, but instead he became the favorite theatrical critic of Paris and then a successful author and novelist.

M. Lemaitre is a man of robust figure

The British ship Craigmulien, which was 115 days out from Singapore for Pico, Peru, has arrived in safety. She was posted as long overdue and 50 per cent reinsurance was paid on her. The British ship Lord Bransey, from Hongkong for Puget sound, has been posted as missing, and the reinsurance on her will have to be paid.

Washington, D. C.—The undersigned, your petitioners, respectfully represent that we are owners, agents or masters that we are owners, agents or masters that we are owners, and others directly concerned in Puget sound shipping, and we most earnestly urge that better protection to Puget sound waters by the establishment of a lighthouse at Claim hay. 30 miles east of Cane Flatters. Claims hay

The Call says: The Pacific Mail Company's file Janeiro arrived from Hong-kong via Tokohama yesterday. She was delayed a couple of hours owing to a blunder made by Captain Russell. When the steamer was passing Fort Point quarantine Officer Chaimers started out to meet her. Instead of slowing down the big liner was kept under a full head of steam and after a vain attempt to catch.

"We submit that a lighthouse out to strety on stormy nights; that there is a distance of 70 miles from Tatoosh light to the next nearest light. Port Angeles, and there are not enough lighthouses on that long stretch of rocky coast.
