A prominent steamboat man says: "My family have used nearly every brand of Beef, Iron and Wine made, and are satisfied that the preparation made by the Estes-Crain Drug Co. is the most palatable and nutritious of any they have ever used." If you are run down and need a tonic, you should use it.

Most so-called "salmon twine" are colored with acids. The acids rot the fibre and render the material useless. In the office of Elmore, Sanborn & Co. is an object lesson that ought to be examined by all fishermen. It is the whole of the material used in the manufacture of Marshall's twine—from start to finish. Go there and examine the color right through. You will then see why Marshall's is called the best in the world.

closed the entertainment. The meeting was largely attended by an appreciative audience. Next Friday night the club will give a stereoscopic exhibition at which an admission of ten cents will be charged.

The markets are now full of fine, fresh vegetables, received on the last steamer from California. What a picture they make! The magnificent black bean soil in Clatsop county, nine-tenths of the vegetables must come from California.

Messrs. Pink Brothers, of Brookfield, are running their stove factory steadily, and most of the time on a turn and a half. The demand for their goods is very large. This speaks well for the enterprise of the Brookfield manufacturers.

Dr. Stephenson, of the Vancouver, Wn., barracks, arrived yesterday to relieve Dr. Brooke, at Fort Canby, who is quite seriously ill and has been assisted during the past few days by Dr. Walker. Dr. Walker was enabled to return to the city last evening.

Collectors for the Astorian will wait on all city subscribers once each week, and considering the low price of the paper, and the large territory which must be covered, it is expected that the price each weekly subscription, twenty cents, will be paid promptly when called for.

The election of delegates to the Democratic county convention will take place today. The polls will be open from noon to 5 o'clock. Much interest is manifested and it is thought a large vote will be cast. The new brewery, it is said, will figure prominently in the election.

A ship captain who was here a few days ago, presented a silver piece at one of the banks which in Mexico was equal in value to \$5 in gold, but, according to our standard of value, was worth only a fraction over 2. In Japan and China the piece has the same value as in Mexico, and still the cry is heard for free silver.

Mr. Emil Schacht, the well known Portland architect, arrived in the city yesterday. He anticipated opening his for the construction of Kopp's new brewery, but the past bad weather made it impossible to print all the plans; hence, the receiving of bids will be postponed. Announcement will be made later in regard to the matter.

President Curtis, of the Northwest Construction Company, referring to the "telegram" from Clatskanie concerning railroad work going on there, said that there was a small piece of special work to be done, of which Engineer Root has charge, and possibly employ a right of a dozen men, which was of no little importance that it was hardly worth mentioning.

The office of the Astoria Land and Investment Company was ornamented with another Irish addition to Astoria. A free hand pen and ink sketch of the bay, Astoria, and Warrenton, was executed by Secretary Smith showing in green certain tracts of land across the bay. For its size it is one of the most artistic pieces of work yet seen in any company's office.

Some people seem never to be satisfied. A heavy owner of Astoria realty was yesterday evening, R. L. Boyle, of the office on Commercial street, and noticed that they had a cheap farm for sale on their bulletin board. Apparently, for four months past, Boyle, who has deliberately backed up against the board, and carried the farm away with him.

The annual meeting of the Ten For Tennis was held last evening at the residence of the Misses Nickerson and the following officers were elected for the ensuing year: President, Miss Nora Nickerson; vice-president, Miss Pauline McKean; secretary, Miss Lou Rice; treasurer, Miss Sue Elmore. The club intend to improve their grounds and contemplate a very successful season of tennis.

The Japanese begin building their houses on the roof. The roof is built and elevated on a skeleton frame. Then it affords shelter to the workmen from the storms. The idea is a good one and might possibly be used to advantage in Astoria. It has been suggested that the railroad company build the depot in that manner and perhaps the ground for the foundation would be placed under it later—ten years later.

In discussing the matter of lighting the city yesterday, a well known councilman said that he should like to see the establishment of the city's own plant as soon as possible. He claims that a saving of nearly one-half the expense to tax-payers will be made by utilizing the power at the waterworks to run the city's own plant. It is estimated that the power will be sufficient to furnish all the lights necessary at present and for some time to come.

Messrs. H. M. Lane, John Berg, and Wm. Newstrom, of Roslyn, Wash., are in the city, guests at the Parker House. The gentlemen are partners in business and are looking for an opening in Astoria. Mr. Berg says that business is very dull in this part of the country. The gentlemen are running only about two days a week, their sales being very largely hampered by prohibitive railroad rates. The outlook is not very encouraging in that section.

Mr. H. M. Quincy, of the Nehalem, was in the city yesterday and stated to an Astorian representative that the Caldwell lumber mill at Grand Rapids was broken into last night and all of the circular saws were stolen. No trace of the thieves has yet been discovered. The loss will amount to several hundred dollars. He says that the valley is in a prosperous condition, and stock is looking very fine, the winter having been so mild. The ground is yet too wet for plowing, but the farmers anticipate a good season. A new house has been erected on the Kirkpatrick place.

Corey Brothers yesterday sent the steamer Electric to Ilwaco after a large scow to be used in the rock work service above Tongue Point. A large number of men were yesterday unable to go to the railroad camps because the steamer was off her run. The contractors seem to be buying up all the scows and employing all the men in this part of the country. The steamer State brought up quiet a number of railroad men looking for work, who will be given employment at once. Mr. Corey says he does not see his way clear to close a contract with Dr. Nansen at the North Pole. It is not only cold up there, but he thought England claimed that part of the earth and it might be dangerous business.

NOTICE TO CONTRACTORS.

Estimates for a new brewery building to be erected at Astoria, Or., for Mr. John Kopp, will be received up to March 10th, 1906. Contractors will pay \$20.00 for use of set of plans and specifications. Orders will be taken by: L. Boyle & Co., 525 Commercial street, Astoria, Or.; EMIL SCHACHT, Architect, Rooms 217, 218 and 219, Commercial Bk., Portland, Or.

The city of Sydney, Australia, has imposed a fine of \$1 upon any person convicted of spitting upon the floor of a public building, or upon the street. Why not Astoria follow suit?

FOR MARCH, APRIL AND MAY!

Paine's Celery Compound the Best Spring Remedy

Today in All the World.

It Purifies the Blood as Nothing Else Can Do--It is Food for the Tired Brain--It Makes Strong Nerves.

Publicly Recommended as No Remedy of Any Kind Ever Was Before by Thousands Whom It Has Made Well.

Endorsed and Prescribed by the Ablest Physicians in Every City in America.

Where every other remedy has failed Paine's celery compound has made people well! It cures disease! It has saved the lives of thousands of sufferers. It has made the weak days and nights strong. Paine's celery compound purifies the blood as nothing else can do. It builds up shattered nerves; it is preeminently the one great health-maker known to medicine.

First discovered after laborious, studious scientific research by the ablest physician America has produced, Prof. Edward E. Phelps, M. D., LL. D., of Dartmouth college, it is prescribed and publicly endorsed by the best practitioners in every city of America. It has been

so enthusiastically recommended by grateful men and women in every walk of life that it is today in every sense the most popular remedy in the world. It has proved itself so easily the greatest of all spring medicines, making the weak strong and the tired well, that in the big cities, New York, Chicago, Philadelphia, Boston, St. Louis and the rest, the leading newspapers, making their own canvases again this year, have found that the demand for Paine's celery compound as far surpasses that of all other remedies as the curative power of this great compound surpasses that of all others together!

Paine's celery compound, taken during the early spring days, has even more than its usual remarkable efficacy in making people well. It makes short work of all diseases of debility and nervous exhaustion. It rapidly drives out neuritis, sleeplessness, dyspepsia, and rheumatism from the system. It removes that lassitude, or "tired feeling," which betokens weakened nerves and poor blood.

Overworked and tired women are but one class of persons who are urgent need of this wonderful remedy to make and keep them well. Business men who are not sleeping soundly, shop girls made pale and sickly by long hours of indoor work, and the countless sufferers from dyspepsia, kidney and liver trouble, need the invigorating effect of Paine's celery compound now that spring, with all its dangers, is at hand. Its preeminence as a health-maker comes from its extraordinary powers of supplying appropriate nutriment to the blood, nerves and brain.

Just as the great lawyer studies each one of his cases till he knows it on every side, and in every possible aspect, so Prof. Edward E. Phelps, M. D., LL. D., of Dartmouth college, the discoverer of Paine's celery compound, had studied the nerves in health and disease, when well-nourished and when under-nourished, in men and women and children years before he looked for the remedy. Paine's

celery compound was the outcome of his entire professional life. A fitting memorial to a life of hard study and close observation—a remedy that the world could not lose today, at any price! Take advantage of the remarkable power of this greatest of all remedies for restoring vigor to the blood and strength to the nervous system. In these first days of spring one has every chance for getting well. Don't neglect it. Paine's celery compound calms and equalizes all the nervous tissues and induces the body to take on solid flesh. It purifies the blood, as is so clearly shown by the rapid clearing of the skin of all evidences of bad humors within. It is an infallible relief for salt rheum, eczema, and all blood diseases.

Physicians recognize Paine's celery compound as the one scientific spring remedy, and it is universally prescribed by them wherever there is a great need of a vigorous and prompt restoring of health and strength to the worn-out system.

REV. WALTER'S LECTURE.
 The second lecture in the "Epworth League Lecture Course" given Monday evening in the M. E. Church, was a decided success. Rev. Walter is an entertaining speaker and master of his subject, which he treats in such a manner that all felt more than repaid for going to hear him. The lecture is instructive and well spiced with humorous instances. Those who stayed away missed a good thing—Kalama Bulletin.
