During March

Colds and chills are prevalent, and unless the system is strong enough to throw them off, serious illness, often ending in pneumonia and death results.

The Cause

Of colds, chills and attendant dangers is found in the blood, poisoned by uric acid, which should be expelled by the kidneys.

The Effect

Of this kidney-poisoned blood is far-reaching. Health and strength are impossible while it exists. The system is being continually weakened, leaving it open to the ravages of colds, chills, pneumonia and fevers.

The Cure

For such a diseased condition is found in Warner's Safe Cure, which will restore the kidneys to health and enable them to properly perform their functions. There is no doubt about this. The record of the past is

Proof Positive.

ICE CREAM SODA TODAY.

C. B. Smith, the confectioner, will begin the manufacture of his famous ice cream today. Everybody knows what his goods are, as they are made from the pure cream fresh from the creamery every morning. Ice cream soda a specialty. Private parlors for ladies.

THE NEW LIFE OF LINCOLN.

The first four Lincoln numbers of McClure's Magazine (November to February, inclusive) are out of print, although as many as four editions of a single number have been printed. It is impossible for the publishers to supply subscribers with these numbers. Therefore, the Lincoln articles from these numbers have been reprinted in one volume, with many additions in text and pictures. This volume covers the life of Lincoln up to the time of the article in McClure's Magazine for March. It will be on sale March 10 on all news stands, or subscribers can order it and begin their subscriptions with the March number. It is a volume of 20 pages, with 100 pictures, including 20 portraits of Lincoln, and it costs 50 cents.

All the world loves a lover; in fact people will go out of their way to see a happy couple. Those who were fortunate enough to be in the lobby of the postoffice yesterday afternoon saw such a pair of lovers as the world likes to see. A young man and a young woman were embracing up and down the lobby yesterday afternoon. They were evidently, by their appearance, new arrivals in this country. Back and forth they went, and the lobby could be seen mistaking the love that shone from their eyes. As lovers they gave every indication that happiness was a plentiful article with them. The young man, perhaps thinking of happy days long passed, but the lovers still kept up their promise, little thinking that they had cast a ray of sentimental sunshine over the prosaic lobby of Uncle Sam's postoffice.

NEW BLOUSE-VAISTS.

Large lines of these blouse-vaists are already offered in the shops. Many of the fancy-striped gingham, lawn and percales have separate collars and cuffs of white linen, and some women think this a great convenience, both in wearing and in laundering. Most sleeves are of the straight, wide, bishop shape, with either square or turned-over cuffs. There is a yoke on the back, with either one or two points, and the fullness below is either gathered or laid in meeting side-plaits. Front the fullness is gathered to the neckband, and there is either a plain or lace-fitted box-plait or a row of insertion in the center. The natural-colored batiste waists will be much worn, and the prettier have fronts of sprigged or embroidered stuff, while the backs and sleeves are of the plain fabric; the collars and cuffs are either of white linen or of the batiste--From 'Review of Fashions,' in Demorest's Magazine for 3/1906.
