EASTER MORN.

The glad day of the year is here. Once again the proclamation echoes throughout the earth, "Christ is risen," and stirring up strife and breeding disconback comes the answer, "and hath appeared unto Simon." Bright flowers, and emblems of the Saviour's smiles, and joyous music celebrate the one chief event of sacred history, the resurrection of Him who shall draw all men unto Him. New life is given unto the spiritual the chaplain of the house in Washington world: the lame, the blind and the halt may walk, if he will, in the light of the the Almighty. He doesn't hesitate to new day. The dark shadows of the tomb have been swept away by the brightness well be granted now as at any other of Easter morn and the joy of all true time, and he informs the Almighty that disciples is unalloyed by doubt. Redemp- these reforms, in order to ...ccomplish tion is accomplished and salvation assured. "I go to prepare a place for you." and that we not become discouraged. He says, "Peace I leave with you, my peace I give unto you. Let not your heart be nish "additional protection to American troubled, neither let it be afraid."

## HAMILTON'S MAXIM.

Alexander Hamilton, whose creative mind brought the financial system of this country out of choas, would rise up from his grave to denounce the practice of this decadent administration. He hald down as the essential and fundamental prescription for the preservation of our public credit "that the creation of the debt should always be accompanied with the means of extinguishment." Adherence to this principle has been the well-selected policy of the nation for a hundred years of unexampled progress, but it has remained for the adadulstration of Grover Cleveland to fall away from it in a time of undisturbed peace with no palliation except a perversion of the truth and its unmatched

enpacity for blundering.

During the Hayes administration the Democratic majority in the nouse of representatives refused to pass the ordinary and necessary appropriation bills, except of imployant cal riders, affecting the federal election laws. This insensate and unpatriotic course called forth the memorable denunciation of General Garfield. To coerce the defeat of Abranam Lincoln at the poils, the Democratic party threatened to shoot the government to death; today, after eighteon years of defeat, it declares that it will starve the government to death if it cannot course an independent branch of this government agaiust its will. Shooting and starving having failed as Democratic policies, the latest resort is now to the policy of bloeding. The national credit has been sapped for two years past by the policy of suffering expenses to exceed the insome. Running into debt is the only memorable achievement of the Cleveland administration At the close of the first year and a half of operation, the Wilson-Gorman tariff imposition has fallen seventy-five million dollars short of meeting the current expenses of the government. It has cut down the receipts, both in customs and internal revenue. It has reduced the quantity of goods brought into this country free of duty., It has largely increased the importations of goods made in competition with American labor. Both in what it has tone and left un-Out of these facts certain duties grow. sione, it is condemned by the exhibit of Its operation and the voice of the Amerinan people. Even the specious pretense that it would open the doors of foreign countries to our own exportations has been stamped false by the actual record of facts. The exports of our agricultural products during the first full calendar rear of this pretentious measure were in value \$545,714,375, while under the abomlvalue \$56,714,375, while onder the abomi-nated McKinley tariff our arricultural exports averaged 2109,909,00 a year tion, even as a giant bendeth over a greater. Yet in the face of this exhibit and gotent deficit the administration has gone on supinely borrowing money and denying, in the face of the derision of all competent financiers, at home and abroad, that it needed money except to nedeem national obligations in gold For monumental blundering in running into debt and wriggling about under the burden of debt, this administration is the mock of the world. It is clear that the tariff cannot be removed from politics while politics remain a concern of the people. The experience of the past two years has plainly demonstrated the danger of tampering with the Republican principle of protection. It has brought home to every voter the fact that protection protects, and that the American workingman and the American home are the chief beneficiaries of genuine protection, as they chiefty suffer when protection is unduly lowered or withdrawa. It is true that the manufacturers have also suffered, but even the most selfish enemy of capital can feel but poor satisfaction in the distress of employers which carries with it privation for the employed. Working people who voted the Democratic ticket in 1892 in order to splite the men who enabled them to earn a comfortable living have found by bitter experience that

they themselves have been the printepal victims of the calumities which they let loose upon the nation. If the misery engendered by Democratic success is to be fully ended and prosperity for employed and employer alike he insured once more and male permanent, the Republican party must triumph in mext years's national election. If General Weaver had been trank

he would have been jailed for repeating his old stereotyped harangue of last night many years ago. He knows better than to believe the things he says, and the sooner it is made a penitentiary offense for such men to run about the country. tent among honest, but unthinking people, merely for the gratification of their inordinate craving for notoriety, the better it will be for the country.

According to a Washington exchange seems to be on very familiar terms with the most good, should be in the interests of the Republican party. The other day, so the story runs, he prayed very carnestly that the Lord would furmanufactures." There is something odd in all this, but still it may be all right though rather amusing.

No committee that ever started out to

raise a subscription for some popular movement ever complained on the first day, yet the result of yesterday's work by the committee was not only most satisfactory, but is really remarkable. That body of hard workers deserves the utmost praise as well as the thanks of all. Everybody is coming into the procession in some shape or other, and the success of the movement is foregone.
