TO CAPTURE ORIENTAL TRADE.

The project to establish an American-Chinese Chamber of Commerce at Shanghal, the principal mart of China, the lin success of which is now practically as- sible. sured, is the result of recent investiga-tions of the vast possibilities of the country as a rich market for American goods, and is in consonance with a recommendation in the consular reports of ex-Consul Edward Badlon formerly f United States consul to Amoy and Forbishops, and for the consecration on a church or chapel. In addition, mosa, China,

The reason our business relations with this was empre neve been in such a deptorable condition for many years is because the Mongolians have had but little opportunity to become acquainted with American wares. Great Sentain has largely controlled the trade of the Orient. It is a significant fact, however, that wherever the Mongoliuns have had an opportunity to test and use the products of American factories they have been quick to evides a marked preference for them over limitsh and other inferior wares.

The British shrewdly take advantage of this by imitating our wares, fabries, frearms, cartridges, stc., and even go to the extent of counterfeiting the labels used by certain well-known American factories, as shown in Consul Bedlos's reports. American kerpsone oil is known to be so popular with the Chinese that English firms have long made a business of collecting the American cans and filing them with the inferior Russian oil Some years ago a Connecticut manufactorer of firearms sent a special egent to China to investigate the reported initations of their product, which he found were being made in Great Britain and covered with American labels.

The recent investigations into the resuits of the abrogation of the reciprocity treaties conducted by the present congress are invested with special signifsance by our trade relations with China. Bader a reciprocity treaty our exports of flour, kerosene and canned goods to
