What is

CASTORIA

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregoric, Drops, Soothing Syrups, and Caster Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vemiting Sour Curd, cures Diarrhoea and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea—the Mother's Friend.

Castoria.

"Castoria is an excellent medicine for chil dren. Mothers have repeatedly told me of its good effect upon their children."

Da. G. C. Oscoop Lowell, Mass

"Cantoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack mostrums which are destroying their loved ones, by forcing morphine, soothing syrup and other burtful agents down their throats, thereby ng them to premature graves.

DR. J. P. KINCHILOR,

"Casteria is so well adapted to children that recommend it as superior to any prescription knows to me."

Castoria.

111 So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's depart ment have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor open it.

Captain Thomas McCarthy, of the Brit ish ship Scottish Dales, is very angry regarding the libeling of his ship for \$50 by Henry Cowell & Co., of San Fran-ciaco, for alleged damages to 182 barrels of coment while in transportation by vessel from Hamburg to San Diego and Puget sound. The vessel is now lying in the harbor with 1,740,000 feet of lum-ber on board bound for Port Piric, Austrain. The libel proceedings came up Saturday in the federal sourt. Captain McCarthy declares that the action, taken as it was just previous to the ship's departure for a foreign port, is an outrage which, if permitted to pass by without notice, will work an irreparable injury nd masters are both to sail their vessels to ports that will not accord them fair and honest treatment. The cargo, he says, was delivered in Tacoma in exactly to this port. He says both ship owners the same condition in which it was placed in the ship's hold, and, further, that no matter what damage it may sustained there was no excuse for such tardy action on the part of the libelants, the ship having been in port two months, during which time the matter could have been settled without the ship's being detained. "Why was this action not taken earlier," so that I could have fought it. small and petty annoyances go a long way and give a port a bad name. I am sure that neither myself nor the ship owners would contest any "alid claim for damages. The complainant says that a number of barrels of cement were injured because of the unseaworthiness of my vessel. For the past two years

MATTERS MARINE. I do not think there has been a bucket The vessel has been detained in port sev-eral days by the libel proceedings. Captain McCarthy said last evening that he thought he would have the matter set-sted so that his ship could sail today.

RAILWAY CONSTRUCTION.

Renewed Prosperity Indicates Addition of a Large Mileage.

In the last baue of the Raifway Age appears an article on the prospecta for allway construction in 1896. For the last eight years, it claims, the mileage of new construction has been steadily decreasing. From nearly 12,000 miles of track laid in 2 the year 1887, the totals have gone down by thousan's and hundreds until 1895 touched the lowest round for twenty years by adding only 1,83 miles to our railway system.

This falling off in actual railway building has been the result of temporarily unfavorable financial conditions and not of a cessation of demand. An immense fleage of new roads was projected and desired all through the hard times.

It appears that in every one of the states and territories except Bhode Islands and work has been commenced or is about to begin on one or more new lines. territory and Oklahoma, in which 1,655 513 miles: Tennessee, 452 miles: Missourt Ohto, 353 miles: Wisconsin, ichigan, 317 miles: Californ Michigan, 278 miles: North Dakota, 250 miles.

BHALL FOYE GO TO COLLEGE Some Are Fitted for Life, and Others Are Unfitted by College Training

Rev. Charles H. Parkhurst, D. D., in Rev. Charles H. Parkhurst, D. D., in his paper to young men, in May Ladies' Home Journal, discusses "Shall We Hend Our Hoys to College?" answering the query with the assertion, "That depends a great deal on the boy." He gennounces himself to be a thorough believer in the college, but holds that "it might not be best for him four boys) to go to college: it might not be best for the community that he should. College can fit a man for life, and, also, it can unfit him. There are styles of educaunit him. There are styles of educa-tion that disqualify the student for do-ing what he is competent to do, without qualifying him to do that which he

qualifying him to do that which he might like to do, but for which he tacks, and always will lack, the prejudities.

As a general principle, the more a man knows the better, but so long as the present order of things continues a great amount of very ordinary work will require to be done; and ordinary people will do ordinary work better than extraordinary people will, and be a great deal more comfortable while doing it. Hordes of both sexes are entering college for the reason that they do not enjoy do-ing commonplace things. The result is that commonplace things are left undone, and uncommon things fare still Agriculture is the material basis of a nation's strength and prosperity. We could dispense with either lawyers. doctors or ministers better than we could with farmers. Probably we should not quarrel so much if there were fewer students of the law; should not e sick so much if there were fewer students of medicine, and should not be so wicked if there were fewer students of theology. All of these could contri-bute liberally to the ranks of the agriculturalists with advantage to the pronarkets. I am not disparaging any-ody, neither am I saying that it would ot be a good thing, in Itself considered, every one, however material or menial in occupation, could receive all that the finest school or college training could confer but that is not practicable at present, and never will be till people get ver thinking that there is a disgrace at aching to the doing of ordinary things.

WESTERN OREGON.

Weather-The past week opened with fair, warm weather, but on Wednesday banged to rainy and cloudy weather unce Wednesday there has been little Over one inch of rain fell in the Wil amette valley and along the coast dur-ng the past week, and from one-half to hree-quarters of an inch fell in Douglas, losephine and Jackson counties. the first of the month over 18 inches of rain have fallen at Langlole, Curry coun-ty. Throughout Western Oregon the rainfull so far in April has been in excess of the normal. A thunderstorm prevailed in the Willamette valley the afternoon and evening of the 20th, which was accompanied by lightning and hall. The temperature has averaged four degrees higher than the preceding week, the mean being 49 deg. The day temperature averaged 56 deg., and the night 42 deg. The highest temperature during the week was 66 deg., while the lowest was 26 deg. There was a marked de-ficiency in the amount of sunshine. The winds were generally southerly and light There were a few light frosts, out from them no damage was done Crops-The sunshine and warmth of the first two days of the week placed the soil in good condition for plowing and seeding, but the rain which com-menced on Wednesday again retarded far work, and the week as a whole must be recorded as being unfavorable to farm operations. The rise in temperature was of great benefit to the sown grain. was of great benefit to the swin grain, both fall and spring. The spring grain is now above the ground and is stooling very well. The fall and winter-sown grain are very promising. Sunshine would be of great benefit now, especially to grain on low lands. The rains have greatly retarded spring sowing; the re-sult will be that much oats will be sown usiles of new road are seriously contemplated. The states next in the list are later for hay, though spring wheat later for hay though spring sown spring grain is expected to pro duce only hay. So far the weather has not been injurious to the grain crops. The ground is thoroughly soaked, and unless the weather should suidenly lear off and become very dry and warm the present supply of moisture in soil is sufficient to mature all rops. rains have retarded work in gardens. Po tatoes that were planted in March have made good growth, and the new po-tatoes are as large as walnuts. The mion crop of Washington county is not intirely planted as yet, the rainy weather seriously retarding that work. The season is somewhat late and farming operations are delayed, yet there is sufficient time for all crops to be put into the ground. April in 1876, 1883 and 1893 were

similar to the current month, and these were years of good crops.

Fruit-The blooming of fruit continues;
the peach, apricot and nectarines have dropped their bloom, cherries years and prunes are now dropping their tloom. Apples are yet in full bloom. The cur-rent rainy weather is more harmful to the fruit bloom than was the frost of several weeks ago. The correspondents continue to differ as to the injury done by the frost to the fruit. As was stated in last week's bulletin, the peach crop has been the most seriously injured, but to what extent injury has been done cannot be accurately determined. There will be a circular sent out to all correspondents and fruit-growers asking for special report on the fruit, to be ret lered on May 1, and from these special seports it is expected that in the bulletin next week a comprehensive and accu-rate statement can be given as to the damage, if any, that has resulted to the fruit from the frosts and rain. It is, owever, conceded that in some places damage has been done—the amount is in all places a question. The correspond-ent at St. Paul, Marion county, reports: 'I have taken great pains to examine the fruit and have found that the peach-ca and early cherries are considerably damaged; plums, prunes and late cher-ries are slightly affected, sufficient to save hand pruning. All other fruit trees have all the fruit on them that they can bear." The correspondent at Dallas, Polk county, and correspondents n all counties report: "Not so muc lamage to fruit as was first anticipated. The berries are entirely uninjured, and

will bear with their usual prolific char eteriatics Stock-The range food is good and tock is in good condition. about over and there has been practically no loss. Shearing is nearly completed and an excellent grade of wool has been the clip this year. Sunshine and warmth are greatly needed for all vegetation. The atmospheric conditions have not as yet assumed their

ummer type, and until they do showery weather will result. CRAWFISHING.
