THE SILVER ISSUE IN A NUTSHELL

Many assume that the money question is a very abstruse one and difficult for the ordinary mind to comprehend it. It is made so only because of the crank theorists who present every conceivable phase of money that has been recorded in history, from those who favor hat money, making copper or leather equivalent to gold by the stamp of the government, up or down to lo-cent silver dollars made and maintained as legal tenders by the government.

None of the many advocates of sound money have presented the silver issue so fully and so concisely in a few words as did Secretary Carlisle in his speech delivered at Memphis. Tenn., some months ago. After giving a careful review of our variable financial system and the financial systems of the world, he summarized the whole sliver issue in five brief points as follows:

First-There is not a free coinside try in the world today that is not on a

silver basis.

Second—There is not a gold standard country in the world today that does silver as money along with gold gold as money along with allver.

Fourth-There is not a silver standard. country in the world today that has more than one-third as much money in circu-

lation per capita as the United States have; and Fifth-There is not a silver standard sountry in the world today where the

laboring man receives fair pay for his. The foregoing statements are undisputed. No one of them has been contradicted by even the most fanatical of the silver freaks. The statements are absolutely true, and when the truth of these vital facts is admitted, argument

In favor of the free coinnie of silver

must end. Every free coinage country

is on a silver basis; that is, it has a degraded currency, and not one of them uses gold as money, while every gold standard country ses silver along with gold as a circulating medium.

The two vital points which must strike the great masses of the people as un answerable are the fourth and fifth. The clamor of all who are in distress for labor or money is that our present volume of money should be increased, but It is now clearly shown that there is not a silver standard country in the world that has one-third the volume of money in circulation, but we have in the United States today, and the working man should be halted at once when he notes the fact that there is not a silver standcation should be directed to the editor
