New Astoria

Is located at the terminus of the Astoria and Columbia River Railroad, at the mouth of the Columbia River.

It fronts on the deep water of the Columbia River Harbor, and being perfectly protected from wind and seas, affords the very best docks for ships on this bay: therefore, it is the exact spot for the seaport of the great Northwest.

These facts were recognized by the Astoria & Columbia River Railroad Co. when

Hello, there! What's the matter with the regatta? About time some action was taken in regard to this very import-ant festival. What the city of Astoria wants in August is a regatta queen and the battle ship Oregon—the latter the first of her class in the world; and, ome to think about it, the former wouldn't be very far behind. The queen proposition, asids from the interest which would surely awaken, would be a source of considerable revenue toward the fund, and would assist materially in swelling the prizes. At ten cents a vote at least 5000 votes would be cast, and probably 10,000. Down in California the natives have flests and carnival queens, and, judging from the pictures of the aforesaid queens in the San Francisco papers, Astoria has a right to have a queen. There are more pretty girls in Astoria to the square inch than there are in California to the square mile. Those who do not believe this might easily be convinced by looking up the old files of he San Francisco Examiner, Call and
