## MATTERS MARINE.

## Movements of Vessels at Home and Elsewhere.

The Pathfinder's sails have been stored away.

The steamer Signal arrived down from Portland last evening. She will endeavor to land seven Chinese passengers.

The schooner Kate and Ann sailed yesterday on a sea otter hunting trip. She will cruise along the coast, putting into San Francisco September 15.

The bark Vulture, Captain Dodd, arrived yesterday, twenty-four days from Rodondo. She will leave for Portland today, where she will load lumber.

Both river boats arrived down before 2 o'clock yesterday afternoon. But few landings were made, that the hundreds of delegates to the Old Fellows' encampment might be accommodated.

Shipping matters are very quiet nowadays. Nearly all the movements are small steam vessels. The wharf fleet will soon begin arriving. The Yarana, which has been lying in the harbor so long, will probably receive a grain charter. She is a fine vessel, elegantly finished, and a large carrier.

The British ship Buckhurst is now on the berth at London for Puget sound. The following item taken from a recent issue of Fairplay shows that, like many other British ships, she must have been losing money lately. At an extraordinary general meeting of the Buckhurst Ship Company held at 1 Crosby square, E. C. it was resolved to voluntarily wind up the company, it having been proved that the company could not, by reason of its liabilities, continue its business. Mr. E. H. Forwood was appointed liquidator at a remuneration of one hundred guineas.

The British ship Carnarvonshire, Captain Hughes, which sailed from San Francisco December 15th last for the coast, was wrecked on April 15th on the coast of Oregon. A board of trade inquiry was held at Carnarvon to the loss of the vessel, and the court found that the vessel was not navigated with proper and seamanlike care and the captain alone was in default. It therefore suspended the captain's certificate for a period of four months only, in consideration of the high character given by the owners, coupled with the candid and straightforward evidence which he gave the court.

The steamship Columbia is due this morning from San Francisco, with the following passengers for Astoria and Portland: F. B. Mitchell and wife, Dr. Stetson and wife, J. Campbell, Miss S. Breslau, Mrs. J. Cohen, Mrs. H. Peterson, Mrs. Davis and baby, Mrs. H. Pratt, Miss M. Ryan, Miss Johnson, M. J. Green, A. Ormonde and wife, C. McCoy, H. C. Krause, A. M. Straight and wife, C. O'Neill, F. S. Dunning, William Bower, R. Ferguson, A. J. Johnson, M. D. Kretz, C. H. Wood, Miss A. Targart and cousin, J. G. Haggerty, J. W. McCormack, G. J. McCormack, Mr. Hoff and wife, C. H. Jones, J. H. Brooks and wife, C. H. Dalley, Mrs. A. Roberts, Mrs. C. Baker, Mrs. R. E. Andrews, Miss McDonald, Mrs. M. Thoen, A. Rivalde, Alice Lachmann, Miss Tobolsky, Mrs. M. A. Galt, G. H. Williams, wife and sister, Miss L. Dione, Mrs. W. F. Connor, W. H. Phillips and son, Miss E. Williams, Miss S. Harvey, W. D. Johnson and wife, C. H. Hayes, G. H. Clark, G. Volhard, R. Heibstein, C. Arndt, C. H. Sluder, S. Hirsch, R. L. Aldrich, F. Roderwald, W. Meyer, J. A. Hray, A. H. Smith, G. L. Lohr, J. J. Lorenzetti, W. Beebe, Dr. Harmer, Mrs. L. Lesser, Mrs. H. Lombard, Miss M. Lombard, Miss A. G. Countryman, J. H. Warren, J. W. Dwyer, J. C. Cooper, W. H. Cady, W. Bowen, W. Devered, H. Marston, N. L. Robinson, J. Harnil, J. Blum and wife.

By the German ship Ferdinand Fischer, which sailed from this port in December last, Mr. Emil Shanno shipped a number of boxes of apples to the old country just as an experiment, to see whether they would stand the long voyage or not. The apples were from Wasco county, and were of good keeping varieties, and carefully selected and packed. The captain of the vessel wrote to his friend, Frank Hefner, of this city, that the experiment proved a failure, as any one may readily imagine it to "keep" nice apples on board a ship, even if the temperature remained equable, but it does not seem possible that any one could seriously imagine that apples could be shipped so far, crossing the equator twice and through the Arctic regions once, and arrive safe and sound in Europe. The captain and crew of the Ferdinand Fischer doubtless saved some of the apples from rotting, just as the large family of the old farmer used to keep bread from moulding. The Ferdinand Fischer, the captain wrote, had been wrecked on getting out to sea, but one fairly started, she made a most excellent run, making the trip from the Columbia to Queenstown in 11 days—Oregonian.

## ROYAL Baking Powder

has been awarded highest honors at every world's fair where exhibited.

Corrected.—A—Now, if I understand correctly, the first principle of socialism is to divide with your brother man. If you don't understand it correctly, the first principle of socialism is to make your brother man divide with you.—Birmingham Post.

DeWitt's Sarsaparilla is prepared for cleansing the blood. It builds up and strengthens constitutions impaired by disease. Chas. Rogers.

## WILD GEESSE ARE GOING NORTH.

## They Are Now on the Wing to Colder Climates—Are Under Strict Leaders.

Kansas City Star.

Objects which never fall just now to attract the attention of travelers over Western Kansas are flocks of wild geese feeding upon the rich fields of wheat, which this spring seem to sprout a carpet of green over all the broad domain. To rest and refresh themselves in their annual flight northward, the geese alight in these fields. They select a ground carefully, choosing a spot remote from human habitation and so situated that they may see all the country round about, and thus be warned of the approach of danger in time to take flight.

In their migrations northward in the early spring and southward in the late fall wild geese fly in families of a dozen or twenty, arranging themselves in the form of the letter A, one side of the letter invariably shorter than the other, and the father and mother and mother's sister, a little in advance of the speck. Sometimes many families unite for a time and travel together, but always that inevitable letter A is clearly defined. In the procession led by a gander who has traveled the road before and whose "honk! honk!" guides the flight.

While feeding every family posts a sentinel, who stands in the midst of the feeding flock, his neck stretched high, fixed and rigid as a statue.

Traveling over the Rock Island railroad from Topeka to Hutchinson one day last week with Colonel George W. Veale, of Topeka, who knows all about wild geese, a representative of the Star witnessed the spectacle of patience and faithfulness, and saw, too, an attempt by a farmer boy to steal upon the flock with a gun. The passenger, who was seated in the windows or hastened to the car platform, and the engineers also interested, slowed up the train at a creek. The boy crept down a draw to a point nearest the geese and then began to work his way over a rise. The boy was to be toward the sentinel could not be warned by scent, and the sentinel had not yet come into view. Slowly the boy told his way, his body flat against the ground. Finally he had dragged himself to a point where he could see the geese feeding over a radius of twenty yards from the sentinel, and moving slowly in the direction of the boy. He had only to be patient, and his reward would be a brace of wild geese. But he possessed a boy's curiosity. He raised his head to look. "Quick, quick!" sounded the warning of the sentinel. All was excitement in the camp; the sentinel ran, knowing there was danger. After a dash of thirty yards they rose into the air, but flying low, the sentinel's guiding "honk!" ahead of them. At the quick of the sentinel the boy rose and gave chase, but the geese were too fleet for him, and they whirled to the northward and soon were lost to view.

The geese were in wild disorder when they lifted themselves into the air, but after that not a sound was heard save from the sentinel, whose notes soon became assuring, and before they had flown a quarter of a mile they were high in the sky, and, behold, there was the never-failing letter A.

Then the spectators from the train, which was now moving rapidly, witnessed another spectacle. The danger past the sentinel, which had been in the lead, dropped back and took his position at the end of the long arm of the A, while from that position the father of the family pushed to the head of the column, and from the end of the shorter arm the mother goose flew forward and joined him. Until that moment they had been flying in a southerly direction, but "honk! honk!" commanded the leader, and they whirled to the northward and soon were lost to view.

## ONE WOMAN'S REVENGE

She Vindicated Her Rights and Soothed Her Feelings.

Exchange.

Two incidents occurring in cars a few days ago exhibit the thoughtfulness which some women daily display. One took place in a Sixth avenue elevated train. A party of six, three gentlemen and three ladies, entered the car and found seats. Two of them took a cross seat, and the others placed themselves in the rear of the car. When the train started the passengers about faced the four who were standing in the aisle waiting for one of them, a pretty girl, to make her choice. As she stood for fully two minutes, a long time to have American ladies with boots to catch, speculating as to relative merits of cross and side seats, while the impatient passengers pushed and crowded in their efforts to see her. Finally the pretty girl said: "Well, go sit down; don't you see they want to get past?" And Nell sat.

The other incident was observed in an elevated car at a junction in Jersey City. As the car stopped a passenger, a lady, started to get out. There were several women waiting to get on, and the conductor held up a warning hand, saying as he did so, "One moment, please, till this passenger gets off." The first woman paid no attention, but climbed up, and pushed past him into the car. A second time he said, "One moment, please," and a second time she was ignored. Again, "One moment, please," with the same result.

The conductor, as he saw all were determined to enter, turned in despair to the lady waiting a chance to get off, but as he saw she was smiling in an amused way, he ceased saying, "One moment, please," and counted as four, five, six, seven women forced their way into the car. As the conductor pulled the bell after the lady had alighted, he was heard muttering something about the uselessness of "trying to make women go on their own."

## Children Cry for Pitcher's Castoria.

## "MOTHER'S ROOM."

I'm awfully sorry for poor Jack Roe. He's the boy that lives with his aunt, you know.

And he says his house is filled with gloom.

Because it has got no "mother's room."

I tell you what, it is fine enough.

To talk of "boudoirs" and such fancy stuff.

But the room of rooms that seems best to me.

The room where I'd always rather be, is mother's room, where a fellow can greet.

And talk of the things his heart loves best.

What if I do get dirt about.

And sometimes startle my aunt with a shout?

It is mother's room, and, if she don't mind.

To the hints of others I'm always blind.

Maybe I lose my things—what then?

In mother's room I find them again.

And I've never denied that I litter the floor.

With marbles and tops and may things more;

But I tell you, for boys with a tired head it is jolly to rest on mother's bed.

Now poor Jack Roe, when he visits me, I take him to mother's room, you see, because it's the nicest place to go.

And mother she's always kind and sweet, and there's always a smile poor Jack to greet.

And somehow the sunbeams seem to glow.

More brightly in mother's room, I know, than anywhere else, and you'll never find gloom.

Or any old shadow in mother's room.

—Harper's Young People.

## A NEW IDEA IN COINAGE.

Neither the Silver Nor the Gold Standard, but a Union of Both.

Exchange.

It is a universal monetary standard, arrived at by international agreement, would be an immense boon to the commercial world, is a matter which does not admit of argument. The difficulty arises with the question, "What shall that standard be?" "Gold," cries the gold bug, as soon as the question is put, "silver," cries the silver bug, and so it goes until the matter is settled.

But now arises a fourth party with a new idea, which he thinks will meet the acquiescence of all thoughtful men. It is a species of bimetallic standard, but it admits the use of both metals. It is the bimetallic standard. And so the discord goes on and harmony seems impossible.

But now arises a fourth party with a new idea, which he thinks will meet the acquiescence of all thoughtful men. It is a species of bimetallic standard, but it admits the use of both metals. It is the bimetallic standard. And so the discord goes on and harmony seems impossible.

Mr. Emil Greff, an American citizen, born in Germany, but who has resided in this country since 1860, and is at present the senior member of a large firm whose interests are on both sides of the Atlantic, is the originator of this new idea.

Briefly put, he believes that the union of gold and silver in a single coin in a definite, unvarying proportion of weight and measure would solve the problem of a common money standard or measure of value. This coin could be used as a universal legal tender, with which all nations could be liquidated.

Mr. Greff believes that all these excellent results could be achieved by an alloy containing one part gold to four parts silver. The hundredth of a hundredth of a coin containing one-fifth of an ounce of gold and four-fifths of an ounce of silver. This coin he calls the "one-fifth" coin.

One ounce of pure gold is worth about \$20.7, or one-fifth of it very nearly \$4.14. The market value of one ounce of pure silver is about \$1.29, or one-fifth of it is about \$0.258.

He points out that in the talent he would have a unit that would always retain its gold value of \$1.1, even should the value of silver totally disappear. All, however, is not very simple. The legal tender qualification alone would certainly increase the value of the silver contained in it. If, on the other hand, silver should rise to the former value of \$1.29, the talent may increase in commercial value to about \$5.17. It is apparent that the talent, therefore, comes very near in value to a talent.

One American half eagle, as against \$4.67; approximate difference—34 p. c. One penny, as against \$0.258, as against \$4.67; approximate difference—34 p. c. Twenty marks, \$4.00, as against \$4.67; approximate difference—34 p. c. One-fifth of a talent, as against \$4.67; approximate difference—34 p. c. One-fifth of a talent, as against \$4.67; approximate difference—34 p. c.

In order to see exactly how a coin made of the proposed alloy would look, Mr. Greff employed a jeweler to make a one talent coin of the alloy. The coin was the first of a series of talents. The first is a trifle smaller than the silver dollar, the other exactly the size of a silver quarter. The weight is respectively one ounce and one-fifth of an ounce. The trifling surplus is copper, to give the coin a better ring. Both coins have hemispheres engraved on either side, the reverse bearing the inscription, "Argentum Universale, 1896," the reverse, "United States of America," and "One Talent," and "One-fifth of a Talent," respectively.

It has greater heaving strength than any other—Price Making Power.

## MENU FOR THURSDAY.

Live as Nature dictates and thou'llt never be poor; let the world guide thee and thou'llt never be rich.—Seneca.

Breakfast.

Strawberries.

Omelet with Mince.

New Potatoes in Cream Sauce.

Rolls.

Tomato Bisque.

Corned Beef Hash.

Stuffed Egg Plant.

Dinner.

Oysters.

Veal Soup with Rice.

Tomatoes.

Shad Roe on Toast.

Potatoes, Hollandaise.

Lamb Chops, Macdoelaine.

Sauces and a Little Salad.

Fried Chicken, a la Florentine.

Braised Rump of Beef.

Dandelion and Pork Salad.

Gelée aux Fruits.

It is said that Justin McCarthy has been poor; let the world guide thee and thou'llt never be rich.—Seneca.

Breakfast.
