THE RAILROAD AFFAIRS MOVING

More Contracts Are Being Let and Others Are in Preparation by the Engineers.

INSPECTION TRIP WAS MADE

Rapid Progress on the Grade Above Tongue Point - Grade and Bridges on Branch Line to Flavel is Well Constructed.

During the next two weeks there will be lively times in Astoria. Construction work will commence at the lower end of the city on the grade and trestling and work will commence on the big dock at Flavel.

Mr. A. C. Goerig, the contractor for the work between the bridge and 7th street, arrived in the city yesterday, and will proceed within four or five days to put his men to work.

LETTER PRESSERS, COPYING BOOKS, INKSTANDS, TABLETS, INK, BLANK BOOKS, BLUE PRINT PAPER, WASTE BASKETS, DESK TRAYS, PEN RACKS, TYPE WRITING PAPER, RIBBONS AND CARBON PAPER.

President Curtis, of the construction company, stated last evening that it would be probably a week before he got all of the details of the plans for the depot and other buildings and improvements to be erected at Scow bay in charge of all the work.

On the way to Burnside Point it was noticed that a very large amount of work had been done in the neighborhood of the mill and the grading will soon be completed. The work is being done in the best possible manner and reflects great credit upon Corey Brothers, the contractors.

At Warrenton the party disembarked and walked over the railroad grade to Flavel. The class of work done on this part of the road is fully in keeping with that above Tongue Point. The grade is well constructed, and the bridge across the river is a masterpiece of engineering.

Workingmen: Your welfare is at stake. Hear Judge Northup at Flavel's tonight.

BOMB QUIBBES

"Citizen" Asks Pertinent Questions Concerning Fishing Situation.

1-If the cannerymen can make money by packing salmon at five cents, gross weight, per pound, for the fish, why do they allow large plants to lie idle and they carry over for the years gear?

2-If there is a demand for Columbia river salmon, why does not the stock of last year leave the river and find markets?

3-Why cannot the fishermen of the lower river fish for four cents per pound as well as those above? One hundred thousand dollars have been carried already this season by the up-river fishermen.

4-If the fisher at the mouth of the river cannot afford to fish for four cents, why does it require force, destruction of property and personal violence to prevent them from fishing?

5-If four cents for one-third of the season's catch is lost how can it be made up during the balance of the year even though the price should be raised to five cents?

6-If the fisher at the mouth of the river cannot afford to fish for four cents, why does it require force, destruction of property and personal violence to prevent them from fishing?

7-Does not the Columbia River furnish less than one-third of the Pacific coast pack of salmon, and cannot the world afford to do without the Columbia river fish?

8-Is there not as much nutriment in a pound of Columbia fish as in the same quantity of Chinook fish?
