A FEW FACTS FOR THOUGHTFUL PEOPLE.

The main argument of the ignorant or ill-informed free silver advocate is that the supply of gold is insufficient to make it a correct standard, and its scarcity will tend to depress prices. The average sell by, two different correct compasses annual output of gold of the world for to sail by, or two different correct therthe first half of this century, in round bers, was \$50,000,000. The output for 188 was \$155,-600,000, and for 1894 \$181,000,000. The birth rate among gold using countries is not increasing, while the production of gold is on the increase, as here stated. Nor is this Judge Northup is entitled to indulge the method confined to business men. It is catisfactory reflection that the great broadening with the evolution of man cause of sound money has been advanced from a lower to a higher plain of intelli- and materially strengthened by his presgence. The farmer may now live for a whole year on the fat of the land and never Judge Northup is entitled to the dishandle a dollar in money during that tinction of not only having held the largbank, and draw checks on the bank for what he owes and spends. Neither he nor the men who buy his crops need have a dollar in the bank. They need from scrofulous, skin or scalp diseases only to have credit there. The bank ought to be given Dr. Pierce's Golden owns the money in its vaults, and its customers simply have the bank's obligu-tions. Bank credits perform precisely tions. Bank credits perform precisely the same work that gold and silver do, and they perform it much quicker and more conveniently. The Scots are the more conveniently. The Scots are the most conservative people in the world, and they have had the best banking system of any people for 200 years. On a gold reserve of \$23,652,660 they support hank credits to the enormous amount of \$445,285,000. The best authorities estimate that only one bill of exchange in 500,000 is ever paid in money in England. Gold, ellver, and other money perform one per cent of the exchanges in this country, and credits, in the shape of bills, notes, checks, etc., do the other 99 per cent. The business of the world could no more be done today with gold and sliver than its inland transportation could be done with ox wagons. The 16 to 1 orators, in denouncing the act of 1873, assert that half the money of the country was destroyed, and hold out the idea that our money has been contracted to that extent. In 1872 our popu-lation was \$555,000, and our per capita from was \$555,000, and \$555,000, of money was \$18.79. In 1894 after the country had been suffering, as they say, with the gold standard for twenty-one stors f sent for a bottle and beyears, our population was 68,275,000 and our per capita of money was \$55.44, and we have much better money now than we we have much better money now than we had then. The adoption of the gold standard as a measure of value did not

The lif to I dreamers believe in the so-called double standard, but we would .in he driven by this haw to the use of silver aloue. All gold standard countries use large amounts of silver and no silver standard country uses any gold what ever. As the practical question is the use of the metals, it follows that the gold standard men are the true bimetallists and the 1% to 1 people the real monometallists. Hence the battle that will be fought to a finish this year is whether we will temain under a gold standard.

-No people ever did business under the imaginary double standard, and every attempt to enforce it has resulted in alternating from one standard to another. England tried it for 470 years

and it was an utter failure. France changed her ratio 115 times in twelve years, trying to establish the double standard idea. The phrase "double standard" is a contradiction of terms. Standard means correct measure, and there cannot be two different correct measures of value any more than there can be two different correct weights to THE DAILY ASTORIAN, WEDNESDAY MORNING, MAY 27, 1896.
