carry Oregon in November. The preservation of public and private credit pages) on Woman's Diseases and how to is only just beginning, and there will be more demand than ever for the distribution of sound money literature and the dissemination of true facts on the money question among the voters of Oregon. The time has come, that is to say, when every patriotic citizen must be on his that poor man over there in a double metal, not only to save the sound money heater! electoral vote of Oregon, but, as far as electoral vote of Oregon, but, as far as can be, to wipe out the stain of last ried children in front of him on his bi Monday's disgrace by rolling up an un- cycle. precedented majority for the Republican electoral ticket in November. \_\_\_\_ -

The report of the sub-committee on reciprocity of the committee on ways and means makes instructive reading. It shows in dollars and cents the benefits derived by the producers of the United States, especially the agricultural ones, from the Blaine reciprocity provisions of the tariff of 1890. It shows also the injury done to those producers by the repeal of those salutary provisions and the abrogation of the commercial agreements made under them. The repeal of the reciprocity clauses was one of the most indefensible acts of the Democrats. It was in violation of their own principles. They claimed in 1897 to be in favor of free trade. When they assumed control they found on the statute books a law capital. providing for free trade between this country and others, as far as a large number of important articles were concerved. They repealed it. That law was based on the theory of the free international exchange of non-competitive products. Thus the Latin-American states produce coffee, sugar, tropical fruits and other commodities which this country does not produce at all or in insufficient quantities. The United States, on the other hand, is a great exporter of it. Why not try a remedy so long tried flour, sait means and manufactured articles which the Latin-American states and \$1.09. cannot supply themselves with. The Democrats, by their Wilson-Gorman law, broke up a beneficial free trade which they found established and which had nearly doubled, as compared with 1845, the volume of American exports to South and Central America and the West Indies. They substituted for it an ap- b proximution to their idea of what con- wake the baby. stitutes free trade. That Is, the free admission of competitive articles. While the free trade of Blaine reciprocity chespened the price of necessaries of life, like sugar, to workingmen and farmers and opened new markets to the products of both, the free trade of the Democrats closed those markets to them. At the same time it cut down the wages of American workingmen by sharpening th edge of European competition. Lean protection was given them against the low wage scale of foreign producers. So inevitably their wages sank. The people have come to understand this. Hence have come to understand this. Hence they demand reciprocity and more protextion. They cannot get them now, but they will as the result of the next election. It was useless to attempt to pass a reciprocity measure at this time. A Democratic-Populist senate would defeat it. But the facts set forth in Congress-

of life tice that they intended to return and certainly builds up, strengthens, regulates and cures. Send for a free pamphlet or remit 1 fight therefore for sound money and the cents (stamps) for a large book (19
