New Astoria...

located at the terminus of the Astoria and Columbia River Railroad, at the mouth of the Columbia River.

It fronts on the deep water of the Columbia River Harbor, and being perfectly protected from wind and seas, affords the very best docks for ships on this bay; therefore, it is the exact spot for the seaport of the great Northwest. These facts were recognized by the Astoria

& Columbia River Railroad Co. when

New Astoria Was Selected as the Starting Point for their Railroad

and the Location for the Terminals.

New Astoria is platted upon a plane high enough for perfect drainage, and well protected by a high ridge behind it.

Its streets and avenues are wide, and, in fact, it is laid out on modern plans. Extensive street improvements are now un-

der way.

An office has been opened by the pro-prietors one door east of the Crosby hardware store. Call, be shown the merits of this property, and invest.

In Medieval Days

When people wanted anything they knelt down and prayed for it. However, that was some time ago. Along about 1400 a fellow named Guten-berg, who had 'come do Rhine over,' was monkeying around a carpenter shop in Lentz. He whit-tion some little blocks and actually make are attributed. Then he descripmade an alphabet. Then he rigged a sort of-well, a machine that would look something like our letter press of today. He arranged his blocks in order, put some ink on them, also a piece of paper, and then screwed his press down. That was called printing. Old distensers was called printing. Old Gutenberg made a howling success of the racket, and his head became so swellen that he really snubbed the king one day. The king overlooked it, however, for he had an idea what kind of fellows printers would be Well mails they get the printers. Well, finally they got the print ing system down pat, and, as the centuries rolled by, began printing newspapers—first person, invariably singular number, any gender and hard case.

In This **Enlightened Day**

There are many newspapers—as a matter of fact. But it is an utter impossibility to get a newspaper to admit it. The advertising patrohage of a newspaper depends largely yes, wholly upon its circulation.
A newspaper is a great deal like the human body: if its circulation is good, it prospers; otherwise, otherwise. Some papers publish

Want Columns

That is, a column, or a number of columns, devoted to small advertise-ments. If a fellow wants anything—trouble, a wife, a house—don't make any difference what it is—he can get it by means of a small add. Included in the "want" column are "For Sale," "For Rent," "Lost," "Found," "Stolen" and "Miscellaneous." Now, just see what chumps some people are! Why, a man has been known to hunt over a city—this city—tor days looking to next August. a city-this city-for days looking tion next August, for a house in which to live liad he come to The Astorian office and of the fremes, or a Tickets, 50 cents, to be procured of any of the firemen, or at the New York Novalasked for a want ad, he could have gotten his house without the least ty Store, where seats can be reserved bit of trouble and for about 25 cents. without extra charge.

It is Needless To tell of The Astorian's circulation. The paper has been estab-lished for a quarter of a century. Why, old Concomly read the first rumor of the building of a railroad to his braves from it. Circulation is The Astorian's long suit. Consequently, when a fellow comes into The Astorian office, looks pleasant, throws down 25 cents on the counter and says he wants a house, he
