Brazil has a paper currency issued by the government, a system such as the Populists want in the United States. The Omaha Bee says according to an American business man recently returned from Brazil exchange fluctuates between 914 and 10 pence and every man who buys or sells a dollar's worth of goods does it subject to the risk of fluctuation. Necessarily there is little or no stability. As exchange goes down prices go up. Commodities are three times as high as they were three years ago, before the system of government paper money was inaugurated, but the wages of labor have not raised in any such proportion. Labor does not realize more than half as much in Brazillan currency as it did five or six years ago, though the people have to pay in the same currency

three times as much for all commodities as they did before. Thus this aystem of paper inflation falls heavily upon the working people. The American people should not need a lesson of this kind to convince them of the faults of such a currency system as that of Brazil. Their own experience during the period of paper inflation ought to be sufficient. Then the prices of all commodities advanced, but the wages of labor did not advance as fast or as far and consequently the wage earner suffered. For the first time since the Civil War the American people have witnessed the calamitous consequences of full and unrestrained Democratic control of the Government. It has been edly for sound money. It caused the enactment of the law providing for the nonor and disaster. In administrative management it has ruthlessly sacrificed indispensible revenue, entailed an unceasing deficit, eked out ordinary urrent expenses with borrowed money, aled up the public debt by \$262,000,000 n time of peace, forced an adverse balance of trade, to a perpetual menace hanging over the redemption fund. pawned American credit to allen syndicates and reversed all the measures and results of successful Republican rule. In the broad effect of its policy it has precipitated panic, blighted industry and trade with prolonged depression, closed factories, reduced work and wages, halted enterprise and crip- measures designed to maintain inviolapled American production while stimus ble the obligations of the United ating foreign production for the Amerlemands that the government shall be rescued from the hands of those who have shown themselves incapable of conducting it without disaster at home and dishenor abroad, and shall be restored to the party which for thirty years administered it with unequaled success and prosperity.

Protection and reciprocity are twin must be re-established. Protection for what we produce, free admission for produce, reciprocal agreements of mutual interest which gain open markets for us in return for our open market to others. Protection builds up domestic industry and trade and secures our own market for ourselves. Reciprocity builds up foreign trade and finds an outlet for our surplus.

Protection to Sugar Producers.

We condemn the present administration for not keeping faith with the sugar producers of this country. The Republican party favors such protection as will lead to the production on American soil of all the sugar the American people use, and for which they pay other countries more than \$100,000,000 annually.

"The Republican party is unreservresumption of specie payments in 1879; since then every dollar has been as good as gold. We are unalterably opposed to every measure calculated to deof our country. We are, therefore, opposed to the free coinage of silver, except by international agreement with the leading commercial nations of the world, which we pledge ourselves to promote, and until such agreement can be obtained we believe the existing gold standard must be preserved.
