There is news from he Chicago Bryan Bryan headquarters that there is much discouragement. The truth is there is deep and bitter dissension on the inside of the Anarchist party. There is no doubt whatever that this is so. There has been a clash between Jones and Bryan and the latter is not only anxlous to do all the thinking, but to direct all the movements of others. He is fussing in the New York muddle. He has made a long journey of advertising and courtesy to New England. The fact in the case is that he rattles and wobbles, and that his campaign is a chaos. It will be known as the most complete fiasco in our political history, and he it is who is doing it.

Mr. Bryan says that any one who has contributed to a nation's prosperity or added to a nation's vealth or greatness is a business man. This definition leaves him out of the category of business men, but it embraces some of the noisy politicians and "curbstone orators" who are supporting him. Such of these as have carned a living by honest labor have contributed to the nation's prosperity and wealth, but they have been gloomy failures as business men and free silver would not improve them. In fact, most fering men of them are howling for that policy

It is a most instructive and significant fact that the substantial business men of the country-the men of commercial energy and enterprise-are taking an active part in the campaign for the cause of sound money.
