Miss Ruby Walter returned from Portland yesterday, where she has been attending school, suffering from a severe case of poisoning received from poison oak.

A. J. Wherry, Timothy Corcoran, Nehalem; C. R. Johnson, Chinook; C. W. Fisher, F. Bartoldus, Walluski; Mrs. F. N. Brazee, Fort Stevens, were in the city yesterday.

The question was asked yesterday "what is the difference between free silver and free lunch?" The answer was that free silver is 16 to 1 and free lunch is 11 to 2.

Messrs. Jack and Roy Wherry were in from the Nehalem yesterday. They report that the result of a careful poll shows that old Nehalem will give McKinley a good majority in November.

More boots and shoes will arrive at Columbia Shoe Co. in the next ten days than has ever been received by any store in the city in the same length of time. (Successors to Copeland and Thorsen.)

The electric light company has been engaged for the last few days in raising the wires to the new poles. It will take about two weeks more to finish the work, which will then give the West Shore Mills Co. one of the finest plants on the coast.

Yesterday the large marine boiler for Kopp's new brewery, built by the Astoria Iron Works, was moved from the shops to the brewery. As the boiler weighs nearly nine tons, it may be imagined that the task of moving it was no inconsiderable one.

An interested crowd gathered on 11th street between Bond and Commercial yesterday afternoon to watch a small dog destroy a dozen large rats. The dog, it is needless to say, did first-class work. A few more such pest destroyers would be a blessing to the city.

It is said by a gentleman who is on the inside, that the Elks' social, to be given on the 19th, prox., will be one of the most elaborate events of the kind ever witnessed in Astoria. Every preparation is being made by the members of the order to make the affair a grand success.

If necessity is the mother of invention, the child of genius was on view yesterday near the O. R. and N. dock where a fisherman had rigged an impromptu net rack on the frame of his boat tent, with the web hanging over in the manner of a lace curtain. The Columbia river fisherman is equal to the occasion.

It has been suggested that if the present Republican hall is not found large enough to accommodate the crowds who want to hear Senator Mitchell next Monday, the new Board & Stokes hall might be used for the occasion. It will seat 700 people, and the acoustic properties are the best, and it could easily be turned into an old-fashioned wigwam.

At Weston, on Wednesday, at the home of the bride's parents, was solemnized the wedding of Mr. A. W. Prescott and Miss Maude West, by the Rev. Mr. Dunlop, of Warrenton. The relatives and intimate friends of the families were present. After the ceremony the couple took the evening boat for Salem, where Mr. Prescott is engaged in the practice of law.

Mr. J. H. Imhoff, of the Astoria Marble Works, returned yesterday from a business trip to up river points on both the Oregon and Washington sides whether he had been summoned. This concern is one of the many Astoria institutions whose extent of business operations is from the coast towns to and territory contiguous with Portland and other interior cities.

These beautiful fall days and moonlight nights refute the imputation that Astoria has only rain and mud. Yesterday afternoon the bay at high tide presented a fine picture. A number of small sailing vessels left different wharves and made their way across the waters, with their tall masts and sails drying in the sun, added to the impression that there might some day be a harbor in Astoria.

Yesterday afternoon at Grace church the meeting of the Woman's Auxiliary Board was addressed by Capt. Sebald, chaplain at Fort Canby. The captain delivered a most interesting discourse upon the history of women's work in the church in the past; what they are doing in the present, and what they can do in the future. The chaplain was listened to with the greatest attention throughout his talk, and his long experience enabled him to give much valuable information.

Rev. Henry Marcotte has just returned from the meeting of the Synod of the Oregon Presbyterian Church, which met in session at Union Oregon, from the 8th to the 12th inst. The assembly was generally conceded to be the most delightful ever held by that body and was extremely satisfactory both from a spiritual and from a business standpoint. Astoria's pastor was chosen as recording clerk of the session, and delivered the evening sermon on Sunday, the closing day of the meeting. Much interest was manifested in the work along all lines and the labor in missionary fields for the year promises unusually bright results.

A gentleman who has just returned from the Sound, says that while standing on one of the streets of Seattle,

he noticed a man standing on the corner scratching his head, evidently in deep thought. Another gentleman approached him and asked him the cause of his perturbation. It transpired that the man who was worried was a Populist, and the man who accosted him was a gold standard Democrat. The Populist said he was figuring out the political situation, upon which the gold man expostulated with him for such hard work, remarking that if he did not stop scratching his head he might get his fingers tangled up with the wheels.

The new warehouse building now being erected by the Board & Stokes Co., and which is almost completed, will be one of the features of the portion of the city in which it is located. The structure is two story, a large warehouse room occupying the first floor, and a handsome hall is located on the second floor. The hall room has a 25-foot ceiling, with a seating capacity of 700 people, is heated by hot water, and is especially adapted to public meetings, concerts, banquets, etc. Special attention has been given to the acoustic properties of the hall, which are first class in every particular. The windows will be finished today, and the lower room could be occupied at once for political meetings or similar events. Electric lights can be put into the building on a few hours notice, and Astoria has secured what it has long needed—a first class hall with large seating capacity for all kinds of public entertainments. The rooms are so commodious and well arranged that they would accommodate a fair, or exposition. In case Astoria should decide to hold a salmon fair and make an exhibit of Clatsop county products, it now has a commodious building in which to hold such an exposition.

MORE BRYAN FORGERIES.

Some Methods Exposed Which Have Been Used on an Unsuspecting Public.

The disreputable methods and lying inventions of Bryan's campaign managers and press representatives have been so thoroughly ventilated and discredited that hardly any respectable paper now dares to notice the fresh takes and falsehoods which continue to emanate from these sources. As the campaign closes, however, there is one species of fraud in which the small fry among the disorderly elements now threatening the country has become so adept, and which certain local free silver organs, in their desperation over Bryan's waning chances, are preparing to carry to such flagrant and offensive lengths, as to require immediate and vigorous interference.

Knowing very well from previous experience that no campaign statement which they could print as their own production would carry any weight or command any attention, these papers are now stealing the cloak of the telegraph companies under which to utter the vilest and most preposterous calumnies against McKinley; and by means of bogus and forged dispatches, purporting to come through the reputable agency of some press association, they are daily dishing out to their readers pretended developments and facts in the campaign favorable to Bryan's interests which have never had any existence and could never happen except in the disordered imaginations of their diseased or dishonest brains.

It is perhaps known to most newspaper readers in this city that the Astorian controls the only telegraphic press report which comes to Astoria, and every word of the columns of pretended telegraphic news printed in other papers is manufactured bodily in the offices of these publications, or clipped and garbled from old newspapers arriving here by slow course of mail.

It would be a great shame and injustice, after all the legitimate and painstaking labor performed for McKinley and the cause of sound money by the Republican organizations of Clatsop county, if one solitary uninformed or timid voter should be influenced or distressed by the falsehoods which may be expected to appear in these papers on the eve of election.

The following certificate from the managers of the only telegraph companies whose wires enter this city ought to put a quietus upon dishonest campaign methods of this order. It has been procured and is published in the interest of truth and the protection of Clatsop county voters against the frauds and impositions already attempted and which will be still further attempted for the purpose of misleading them in their patriotic duty on the third day of next November:

We, the undersigned, local managers respectively of the Western Union and Postal Telegraph companies, hereby certify that the Daily Astorian is the only paper published in Astoria which now receives, or at any time during our control of said offices, has received, a telegraphic press report.

THE MINE OWNER'S PROFIT AGAIN.

Bay Port, Mich., Sept. 29, 1896.
To the Railway Age:—
I read with interest your answer to J. R. Dimond, who asked wherein the mine-owner would be benefited by free coinage at 16 to 1 ratio, in the supplement of September 25. The answer was good, but to the exacting mind you did not go far enough with your figures. Your illustration is as follows: The mine-owner employs 400 men at \$2.50 per day on the present money basis and pays for labor \$1,000 a day, or, in round numbers, \$350,000 per year. The general expenses are \$100,000, or a total expense of \$450,000. The output being valued at \$500,000, leaves profit of \$50,000, all of which are worth 100 cents each.

Under free coinage at the above ratio, Mr. Bryan tells us a dollar would be still receive \$2.50 each day, or \$350,000 for their labor, the same as now, but in 50-cent dollars. As supplies and machinery would double, the mine-owner would pay \$200,000 for general expenses, or \$550,000, total expense for the year. The output being doubled because of 50 cents worth of silver being stamped one dollar, would bring the output to \$1,000,000 per year. The total expense being \$550,000 per year and deducted from the output of \$1,000,000, would leave profit of \$450,000, all of which would be 50-cent dollars.

Now the eye-opener comes. To find the real gain in dollars of 100 cents each, divide the \$450,000 profit by 2, and it leaves a gain of \$225,000, instead of \$50,000 as now. Now where is this extra \$175,000 made? Not on purchases of supplies, etc., as this account was doubled—not on the output. So there certainly can be no other place than on 400 employees; and this with no extra exertion on the mine-owners' part, but simply by an act of congress. Still the "boy orator" and his followers tell us sons of toil that we are whipped into

line by railway officials, etc. What rot! It is easy to tell the size of his hat, when a man will insult the wage-earners by making an assertion like that. They are losing more votes than they are gaining by such insults. The wage-earner, like all others, believes in "stopping an eye on the fellow that cries 'stop thief.'"
