Rights of Women.

The Republican party is mindful of the rights and interests of women. Protection of American industries includes equal opportunities, equal pay for equal work and protection to the home. We favor the admission of women to wider spheres of usefulness, and welcome their co-operation in rescuing the country from Democratic and Populist mismanagement and misrule. Such are the principles and policies of the Republican party. By these principles we will abide and these principles we will put into execution. We ask for them the considerate judgment of the American people.

Confident alike in the history of our great party and in the justice of our cause, we present our platform and our considerations, in the full assurance that the election will bring victory to the Republican party and prosperity to the people of the United States.
