The question of rates is a practical question, to be governed by the conditions of the time and production; the ruling and uncompromising principle is the protection and development of American labor and industry. The country demands a right settlement and then it wants rest.

#### Reciprocity With Other Nations.

#### The Financial Issue.

"The Republican party is unreserv edly for sound money. It caused the enactment of the law providing for the resumption of specie payments in 1879; since then every dollar has been as good as gold. We are unalterably opposed to every measure calculated to debase our currency or impair the credit of our country. We are, therefore, opposed to the free coinage of silver, except by international agreement with the leading commercial nations of the world, which we pledge ourselves to promote, and until such agreement can be obtained we believe the existing gold standard must be preserved. All our silver and paper currency now in circulation must be maintained at a parity with gold, and we favor all measures designed to maintain inviolable the obligations of the United lating foreign production for the Amer-States, and all our money, whether coin or paper, at the present standard, the tions of the earth."

The massacres in Armenia have aroused the deep sympathy and just indignation of the American people, and we believe that the United States should exercise all the influence it can properly exert to bring these atrocities to an end. There and everywhere American citizens and American property must be absolutely protected at all hazards and at any cost.

We favor the admission of women to wider spheres of usefulness, and welcome their co-operation in rescuing the country from Democratic and Populist mismanagement and misrule.
