Senator Chandler is not going about his bimetallic campaign in a way to please Senator Peffer, who, however, thinks Senator Chandler's plan for an international monetary commission may at least be useful in furnishing the Populists in congress with an opportunity to "discuss the money question generally." That is exactly what the country does not want. It has heard too much of their silly thories already. Talking in congress on the exploded silver issue is merely a waste of valuable time, and a weariness to the flesh Nor is there any need of another monetary commission. We have had several, and they were spent in exploiting the ideas of theorists. What we want ER'E MEDICAL CO., Buffalo, N. Y.

is some practical work. The promise of the Republican platform is that an attempt will be made to obtain an international agreement. We trust President McKinley will abandon the ideas of another monetary conference, but make the subject one of direct negotiation through diplomatic channels. Our ambassadors and ministers at the capitals of the European commercial nations are the proper persons to make 50 representations directly to those governments, and obtain a direct and authoritative answer to the question whether they will enter into an international agreement regarding silver. If the answer is affirmative, the details can then be arranged. If they refuse, that ends the project. An international agreement must have the consent of the parties interested. Without it, we can do nothing.

In Medieval Days

When people wanted anything they knelt down and prayed for it. Howabout 1400 a fellow named Guten-berg, who had "come de Rhine ove:" was monkeying around a carpenter shop in Lentz. He whittled some little blocks and actually made an alphabet. Then he rigged a sort of-well a machine that would took something like our tet-ter press of today. He arranged would look something like our tetter press of today. He arranged
his blocks in order, put some ink
on them, also a piece of paper, and
then screwed his press down. That
was called printing. Old Gutenberg
made a howling success of the
racket, and his head became so
swollen that he really snubbed the
king one day. The king overlooked
it, however, for he had an idea
what kind of fellows printers would what kind of fellows printers would be. Well, finally they got the print-ing system down pat, and, as the centuries rolled by, began printing newspapers-first person, invariably singular number, any gender and

Want Columns

That is, a column, or a number of columns, devoted to small advertisements. If a fellow wants anything—trouble, a wife, a house—don't make any difference what it is—he can get it by means of a small ad. Included in the "want" column are "For Sale," "For Rent," "Lost," "Found," "Stolen" and "Miscellaneous." Now, just see what chumps some people are! Why, a man has been known to hunt over a city—this city—for days looking for a house in which to live. Had all things, look pleasant. Tell the clerk that you want a want ad, in clerk that you want a want ad, in the want column, give him your 25 cents and go away happy. Absolutely Dry and Pure Tropica Climate

Pronounced by Physicians the most Favorable in America for sufferers from . .

> Lung Diseases and Rheumatism

Many Remarkable Cures

The objections urged against Indio in the past by the large numbers who otherwise would have been glad to take advantage of its beneficial climate, has been a lack of suitable accommodation. The Southern Pacific Company takes pleasure in announcing that several

Commodious and Comfortable Cottages

have just been erected at Indio station, that will be rented to applicants at rea-sonable rates. They are furnished with modern conveniences, supplied with pure artesian water and so situated as to give occupants all the advantages to be de-rived from a more or less protracted residence in this delightful climate.

(From the San Francisco Argonaut.)
"In the heart of the great desert of the Colorado-which the Southern Pacific traverses—there is an easis called Indie, which, in our opinion, is the sanitarium of the earth. We believe, from personal investigation, that for certain individuals, there is no spot on this planet so favorable."

G. T. Stewart, M. D., writes: "The purity of the air, and the eternal sun-shine, fill one with wonder and delight.

Nature has accomplished so ... Nature has accomplished so much that there remains but little for man to do. As to its possibilities as a health resort—here is the most perfect sunshine, with a temperature always sunshine, with a temperature always pléasant, a perfectly dry soil, for rain is an unknown factor; pure oxygen, dense atmosphere and pure water. What more can be desired? It is the place, above all others, for lung troublés, and a paradise for rheumatics. Considering the number of sufferers who have been cured. I have no hesitancy in recommending this gainst oasis as the haven mending this genial oasis as the haven of the afflicted."
