Paine's Celery Compound Is Working Miracles in Curing Disease.

Paine's celery compound is working miracles in the cure of disease. So says a recent article by the foremost medical essayist of Boston. "Nothing shows more conclusively," he adds, "the astonishing capability of Paine's celery compound than the thoughtful, open-minded class of people who use it and recommend it, both in public and among their closest and dearest friends and relatives. Among us (physicians) there is no longer any hesitancy in recommending this great remedy without stint of praise."

Down at Seaside they expect quite a boom this coming summer, and if they do not have one it will certainly be no fault of the real estate men. The Grimes Grove syndicate are preparing to place on the market about 20 acres of the beach property, located just at the north end of the famous Grimes Grove. This company proposes to make it an inducement for people to live at Seaside during the summer months. The Bonita Land Company, however, are coming to the front with the largest tract that has been put on the market at Seaside in years, and they will make every effort to create a stir there during the season. Their land consists of 19 acres of the famous Holiday estate, and lies immediately south of Grimes Grove. It has always been considered the cream of beach property at that resort.
