Astoria is rapidly coming to the front as the principal port and business center on the northern Pacific coast. Every indication points to the fulfillment in the near future of the fondest hopes of her most ardent supporters. The railroad is being constructed more rapidly and in a more solid manner than could have been expected, particularly during the general business depression of the past months. Now things have turned, people are buying property, and with the building and establishment of auxiliary industries, which will follow the opening of transcontinental traffic, it is only a question of time when Astoria will take its place among the leading ports of the world.

Dr. C. W. Tower, of Coos county, was in the city yesterday on his way home from Salem. The doctor is an old-time friend and schoolmate of Mr. G. Wingate, and was the guest of that gentleman during the day. To an Astorian representative Dr. Tower said that he was going home to put a barbed wire fence around the pops in Coos county. "Governor Lord will call a special session of the legislature some time during the summer. He wants to give the members time enough in which to go home and take the medicine prepared for them by their constituents. I was told in Portland, on

the most reliable authority, that Gov. Lord had appointed J. N. Dolph to succeed Mitchell as United States senator, and that upon Dolph declining the office, the governor had decided to appoint Mr. H. W. Corbett. The state is in dire need of remedial legislation, and I think after the members have thought it over they will pass the appropriation bills. The state institutions alone call for an expenditure of \$30,000 per month.

It was reported on the water front yesterday that the government bonded warehouse was sinking under the weight of the tin being discharged from the British ship Reliance; that the work of discharging cargo had been stopped; that the tin in the warehouse will be placed back on board the vessel, and that the warehouse foundation will have to be rebuilt before the tin can be again unloaded. Investigation proved that the rumor was only partially true. Discharging of cargo has stopped for the present but it is only necessary to reinforce the underpinning of the warehouse, which will take but a day or two, when the discharging of cargo will be resumed.

Captain Robinson, of the Reliance, in conversation yesterday with several friends, said that his recent experience in coming into this harbor had made him so familiar with the situation that another time he would sail directly in without even waiting for a pilot. If there was not one at hand, The Reliance is one of the smartest ships afloat and sails like a yacht. The captain has several times sailed into English ports and into Rio and San Francisco. He says that the new government jetty at the mouth of the river, within the past two or three years, so deepened and widened the channel that a sailing vessel can come into this harbor with a straight shot for the locks as easily as can a steamer. The only trouble is that the charts obtainable in England do not show all of these improvements.

THE HEXT COMPANY.

By far the most select audience Fishers has held gathered last night to hear the Hext & Walker Company. There were not more than 200 present, owing, no doubt, to the Lenten season; but the audience was intelligent and able to appreciate the performance. In the company there are but three persons—all experts. Mr. Carl Walther, the violinist, came in for the greater share of applause. As a musician he has but few peers. The notes seemed to drop from his instrument as if by magic, and the audience throughout his performance was held spell-bound. He was repeatedly encored.

Miss Effie Elaine Hext was the admiration of all in several recitations. Her delivery is excellent. In her possession Miss Hext appeared to excellent effect. Prof. Holub is an artist at the piano, and came in for a goodly share of applause last night.

EXCEEDS THE SUPPLY.

San Francisco, March 5.—The demands for railway accommodations to the fight at Carson on the 17th have

exceeded the anticipation of all railway officials. The entire rolling stock of Pullman's on Pacific coast division on the Southern Pacific from El Paso to Portland has been engaged for the accommodation of fight patrons, fifty Pullmans having been engaged from San Francisco alone. The passenger department of the Southern Pacific believes the company will carry at least 12,000 people to the fight.

When a man owns a blooded horse he is always careful of its health. He looks after its diet and its particular that the feeding should be regular and right. While he is doing this it is likely as not that he is himself suffering from some disease or disorder. When the trouble gets so bad that he cannot work he will begin to give himself the care he gave the horse at the start. Good pure, rich red blood is the best insurance against disease of any kind. All most all diseases come from impure or impoverished blood. Keep the blood pure and strong and disease can find no foothold. That is the principle upon which Dr. Pierce's Golden Medical Discovery works. It cleanses, purifies and enriches the blood, puts and keeps the whole body in perfect order; makes appetite good, digestion strong, assimilation perfect. It brings ruddy, virile health. It builds up solid, wholesome flesh (not fat) when, from any cause, reduced below the healthy standard.
