Poor

When a horse is poor in flesh, a new harness won't give him strength. If a house is cold new furniture won't warm it. If your strength is easily exhausted; work a burden; nerves weak; digestion poor; muscles soft; if you are pale and worn out, the trouble is with the blood. It is not so much IMPURE blood as POOR blood. Pills won't make this blood rich; nor will bitters, nor iron tonics, any more than a new harness will give strength to the horse, or new furniture will make a house warm. For poor blood you want something that will

They are large and or out excellent flavor and are considered otter for all purposes than the rasor lams. Last year a few were found, but at that time they were looked upon as freaks, but this year they are abundant and it is thought that they will increase and make their home here. Mr. Halferty has sent a description of the clam to the United States Pish Commission, giving the circumstances of their strange appearance with the request that an investigation be made of them.
