THE OBJECTION NOT GOOD.

There are people who have objections to advertising matter in the columns of a newspaper. The ground of objection is that they do not want to read advertisements. Now this objection is not good, for oftentimes these advertisements convey valuable information. For instance, how else would the traveling public learn of the excellent dining car service of the Wisconsin Central line between St. Paul and Chicago, or the general comfort of traveling over this popular line. I am more than grateful, as my wife is in better health today than ever before. We can cheerfully recommend your remedy.
