> LOW EXCURSION HATES TO THE OREGON STATE FAIR.

The Southern Pacific will make a one are rate from all points on their lines in Oregon to the Oregon state fair which pens September 30 and closes October A big harvest and a big fair, A clean, vigorous, delightrul and comprehensive exposition of everything pertaining to the farm and the farmer. Good races and amusements of all kinds. Special

attractions every day. With the present crop prospects and the extremely low railroad rate to one fare for the round trip, the people of Oregon can afford to patronize the State fair that benefits all classes.

DRIED POTATOES NOW.

The opening up of a demand for potatoes peeled, sliced, and dried like apples ened. The potatoes are peeled and sliced by machinery, soaked two minutes in strong brine, drained, and dried at a temperature of about 194 degrees. Betwelve to fifteen hours, and have all the freshness and flavor of new potatoes.

SWORDSWOMEN ABROAD.

Some day it wil be the women of foreign countries who will defend their nation's honor after the French-Italian style recently witnessed. Women of the upper classes in France and Spain are generally to fence as carefully and accurately as their brothers, and there are numerous schools where young women are taught not only fence but to use the broad-

Ayer's Cathartic Pills were designed to supply a model purgative to people who had so long injured themselves with griping medicines. Being carefully prepared and their ingredients adjusted to the exact necessities of the bowels and liver, their popularity was instantaneous. That this popularity has been maintained is well marked in the medal awarded these pills at the World's Fair 1893.

a Jewish commonwealth in the ancient home of their race. The same is true the children of the orphanage walking of the Jews in England, and of most of by in procession, was heard to remark: the continental nations. The plan is said to have originated with Dr. Herzl, a those brats never get any bigger. They prominent journalist of Vienna. are others who are men of learning and ability, loyal to the ancient faith and sincerely desirous of renewing the when they can be colored a natural brown nationality of their people. Max Nordau | or black at home with Buckingham's has been interviewed on the subject, and Dys. adduces two reasons for supporting the plan-first, his belief that the Jews must have, for their regeneration, a country of their own; and, second, because he wishes to deliver the Jews from the tyranny and persecution they suffer in European states. "Give back Palestine to the Jews," he says, "or allow them to settle there and govern themselves under the suzerainty of the porte, and a strong national spirit will be awakened throughout Israel.

CONCERNING WOOL AND WOOLENS.

In the New York Commerciti Advertiser, Mr. Abraham Mills, of the firm of Mills & Harding, admits that he is a theoretical free trader, but says his experience in business during the past four years has changed his views as to the practicability of free trade in the United States under present conditions.

"I am not in favor of admitting wool free of duty," he declares. "In addition to the many well-known disadvantages which the American wool grower is under, there is the item of freight charges. Where it costs three cents per pound to ship wool from the West to the East, the foreign product can be brought clear from the Cape of Good Hope for onehalf a cent a pound."

This is all true; but the advocates of free trade in this country have always ignored the practical and business facts which determine whether a given economic policy is profitable to a country and its people. Their theoretical arguments on this point was that to put wool on the free list would stimulate the production of wool in this country. The fall in the value and number of American sheep, because of the fall in the price of wool due to the Wilson law, showed the fallacy of the theory.

Furthermore, Mr. Mills points out the further fact that, because of the undervaluation of imports, made possible by the advalorem duties of the Wilson law un imported woolen goods, that law gave no real protection to the woolen industry. The proof of this is the stagnation in woolen manufacturing, and the idleness of the men employed in most branches thereof, during the life of the Wilson law.

England and some of the continental woolen manufacturing countries have a
