"People in the East apparently to no appreciate the great change that has taken place in the Northwest during the past few months. The Northern Pacific is to. day handling an immense amount of bustness notwithstanding that not more than about one-third of the wheat crop tas been moved. The Klondike craze has been a veritable boom for the Northwest country and has resulted in a nqickening of all kinds of business enterprises, Sev en-subthe of the Clondike traffic has gone over the Northern Pacific, which is the direct route to Seattle. It is estimated that ut least 20,900 people have pissed through Senatle during the past few months enroute to the Klondike and the average expenditure of each person plac nig ft at the lowest posible estimate ? as been \$150, making a total of \$3,000,000. This has all gone into Seattle.

"The Northern Pacific is behind a road being built from Goble on the line of the company, to Astoria. This road, when completed, will be a great feeder for the Northern Pacific and grain for export, which is now taken to Portland and loaded in vessels at that port will go to Astoria, which is on the Pacific coust. The Northern Pacific will get a longer hauf on this traffic, and vessels instead of loading at Portland, as at present, will load at Astoria, thereby saving heavy pilot churges and a distance of 80 miles. The value of the wheat shipped from Oregon and Washington this year is \$63,000,000, creased fully one-third and while the ern Pacific is considered enormous, bust ness in 1898 will be far ahead of 1897. not fully appreciated by people in the Company.
