In an achireus before the Illinois Teachago, President Andrews, of Brown Uni. versity, advocated free lunches in the pub. lie schools. "The authorities," he said, "should arrange in the cities for furnishing lunches to pupils of public schools, if not free at low prices. These should be Co palatable, well cooked and served in the school buildings, under the supervision of the seachers. One purpose," he added, "in having the lunches served upder the sunervision of instructors would be to give the children of the poor beneficial experience in table life and eciquette."

The Same... Old Sarsaparilla.

That's Ayer's. The same old sarsaparilla as it was made and sold by Dr. J. C. Ayer 50 years ago. In the laboratory it is different. There modern appliances lend speed to skill and experience. But the sarsaparilla is the same old sarsaparilla that made the record-50 years of cures. Why don't we better it? Well, we're much in the condition of the Bishop and the raspberry: "Deabtless," he said, "God might have made a better berry. But doubtless, also, He never did." Why don't we better the sarsaparilla? We can't. We are using the same old plant that cured the Indians and the Spaniards. It has not been bettered. And since see make sarsaparilla compound out of sarsaparilla plant, we see no way of improvement. Of course, if we were making some secret chemical compound we might.... But we're not. We're making the same old sarsaparilla to cure the same old diseases. You can tell it's the same old sarsaparilla because it works the same old cures. It's the sovereign blood purifier, and -it's Ayers.
