THE OREGONIAN'S CASCADES WHEAT MARKET.

It certainly must have made Mr. Mobier matter at economy to the producer.

We will suppose Mr. Mobiler to be asked half a cent per bushel, and we would

This would be a reasonable and frank

The Astorian will add, however, that in order to obtain this 15 cents per ton repaid, which of itself is greater than that Drug Co., who spare no pains to secure unt, besides towage, pliotage, and exspening of the channel, all of which would swell the contra costs.

Or, we will suppose that the Dalles ob struction is overcome, and the wheat of Inland Empire is coming down by boat loads. How much less could a transcompany take to have the boats oaded at the foot of the Cascades in place of Portland? Any steamboat owner will own that the 15 cents per ton reduction already mentioned would be extremely Ilberal. So it can be easily seen that the Cascades proposition would increase the cost of transportation instead of Drug Co.

This is justice to Astoria. This is much bester for Portland; decidedly better for the O. R. & N. Company; better for all Oregon; better for the whole of the Paeific northwest. We will have larger ships to carry our grain from an Oregon port at a minimum cost, and will no longe be obliged to ship grain to San Francisco in order to place the same in vessels for

The combined commerce of Great Britair and the United States, with China, is six times that of Russia, France, Germany and Belgium lumped together. The United States has just the same interest as has Great Britain in maintaining the "open duor" commercial policy in China. Our trade will not get in where England's is excluded. . Yet there are men who are howling for trade extension who are horrided at the idea of the United States throwing the weight of her influence and her power as one of the world's greatest mations, into the scale in favor of the "open door" policy. One-third of the

human race dwells in the Chinese empire. The trade opportunities are boundless. Russis, France and Germany seek to conlusion of England and the United States. Is it wisdom to allow them to do it? Is It not rather abject cowardice?

Almost without exception these dreams might become realities if mothers would only teach their daughters the most com-mon sense facts about their own physical make-up, and advise them how to protect themselves from the perits of the three critical periods of their lives—puberty or maturity, motherhood and the "turn of life." Women at these times suffer from irregularities and weaknesses which, if neglected, will develop into dangerous diseases and make their whole lives wretched. The delicate organs that make wifehood and motherhood possible cannot be necand motherhood possible, cannot be neg-lected with impunity. If they are neglect
