FARM POINTERS

No Peace With Slugs

Be sure to get a supply of calcium arsenate on hand to fight the garden slugs when they appear. In the meantime, the burning or plowing of fence rows, ditch banks, and similar uncultivated areas will greatly reduce the amount of slug injury.

Hogs Utilize Waste

Enough waste products exist in the state each year in the form of grain stubble, skim milk and cull fruit and vegetables to produce economically, if balanced with grain, 1,000 hogs. For the state as a whole one hog can be kept in this manner for every dairy cow, one for every 2 acres of grain land, and one hog per farm to clean up the minor waste. This is a safe production program as the people of Oregon consume annually about 391,000 hogs or about one hog for every two persons.

How About a Twig Miner?

"Shall I spray for peach and plum twig miner or cultivate the orchard at the proper time?" many growers have been asking since the late spring has kept them out of the orchard when the spray of lime-sulphur for the twig miner should have been applied. While injury by the miner in recent years has been serious enough to warrant annual spraying for its control, the fact remains that where limited time compels a choice between spraying for it and doing the plowing when the right time comes, the latter is by far the most important. The spray may be safely applied, however, up until the early "pink" stage by reducing the strength of the spray to 9 to 100.

Interest, but no Profit From "Merely Good" Hen

It's only the last 40 or 50 eggs which the "better than average" hen lays that bring the owner a profit over all the costs of production.

"The poultryman whose flock averages 140 to 150 eggs per hen receives interest on his investment but no pay for his labor", says A. G. Lunn, head of the poultry husbandry at the O.A.C. experiment station. "With a well bred flock properly cared for the production would be from 180 to 200 eggs a year. This would net him a profit of 90 cents a fowl."

"It is often found in analyzing farm records that the producer who is above the average obtains an extra premium for his products, as he gets the extra two to four dozen eggs in the early fall when eggs are high. The average overhead expenses on a commercial poultry farm, consisting of interest on investment, taxes and depreciation, equals the cost of feed. It was found through farm survey work. The cost of feeding a fowl on the average commercial poultry farm is between \$1.80 and \$2.00 a year, points out Professor Lunn. On the farm the cost is probably cut one half as the hen obtains some food from by-products. With eggs averaging 36 cents a dozen, it would require six dozen eggs to pay for the feed.

The average production of Oregon fowls is about 100 eggs a year. On the commercial poultry farm it averages from 140 to 150 eggs. This would leave six dozen to pay interest on investment in buildings and equipment and to furnish a profit to the producer.

Oil Sprays for Leaf Roller

Poison sprays are not effective against leaf roller because of the habits of the caterpillar after it begins to work. Instead, a spray is applied to the eggs near the time of hatching. The leaf rollers are in the egg stage now and will hatch about blossoming time. A heavy miscible oil spray is the best for these pests. Light oils like kerosene emulsion have little effect. The rollers are present in every part of the state, but are serious only in the Hood River district, the Grand Ronde valley, and a few other sections of the Columbia basin.

V. getable Bulletin Out

The value of garden vegetables grown in the state exclusively for sale amounts annually to \$1,500,000. As necessary crops in the farm home garden the value of these products exceeds \$2,750,000 yearly, according to a bulletin on vegetable gardening in Oregon by A. G. B. Bouquet, professor of vegetable gardening at the college. Recommendations offered in this publication are based on investigational data and general observations of crops in the field, green house and frame.

Mid-western Folks Lose Lives in Sea Plane

Mrs. August Bulte
Mrs. Lawrence E. Smith
Mrs. J. S. Dickson
Mr. August Bulte
Mr. Lawrence Smith
Robert Moore, pilot

A determination to live up to the letter of his responsibility in caring for his passengers is the reason sea-plane pilot Robert Moore lives to tell of a thrilling 56-hour struggle in the gulf stream off the Florida coast, in which five pleasure seekers from mid-western states lost their lives.

Mr. and Mrs. August Bulte, Mr. and Mrs. Lawrence Smith of Kansas City, and Mrs. J. S. Dickson of Memphis were those lost after a heroic effort against waves, storm and exposure.

They were passengers on the sea-plane "Miss Miami" which made 40-minute trips between Miami, Fla., and Bimini, West India Island. When within three minutes of their destination on Wednesday, a propeller blade broke, forcing the sea-plane down.

The craft landed within a mile of a fishing boat, but, caught in the gulf stream, it was carried north, signals for help being unheeded. One of the sea-plane's pontoons sprang a leak, and in the heavy sea the plane was overturned. The passengers were thrown into the sea. Moore succeeded in getting Mr. and Mrs. Smith and Mrs. Bulte back on top of the wreckage, but Mrs. Dickson and Mr. Bulte were lost.

Then started the battle against wave and a storm which came in the night. The two women died from exposure. Smith died on Thursday, Moore was found Friday by a passing fishing boat, strapped to the wreckage, and unconscious.

Keep Out Potato Wilt

Use no potatoes for seed that show brown discolorations near the surface when cut across the stem end. Such potatoes often have wilt, a disease that seriously reduces the yield of potatoes in many sections of Oregon.

Huban clover is being widely advertised, but under Oregon conditions it is not likely to produce much seed as it matures too late except in the warmest localities.

Hard Federation Beats Bluestem

Hard Federation spring wheat is usually five bushels an acre better than Bluestem and has better milling qualities. It is early and well adapted to eastern Oregon day land.

BULLETIN OF BOARDMAN COMMUNITY CHURCH SERVICE

Every Sunday
Sunday School 10:30 a. m.
Church Service 11:30 a. m.
Christian Endeavor 7:30 p. m.
Prayer Meeting, every Thursday at 8 p. m.
All are welcome.

NOTICE FOR PUBLICATION
DEPARTMENT OF THE INTERIOR
U. S. LAND OFFICE at The Dalles, Oregon, March 13, 1922.

Notice is hereby given that Rudolph Wasmer, of Boardman, Oregon, who, on April 5th, 1917, made Homestead Entry, No. 018641, for SW 1/4 NE 1/4 (Being Unit "C") Umatilla project, Section 18, Township 4 North, Range 25 East, Willamette Meridian, has filed notice of intention to make three-year Proof, to establish claim to the land above described before C. G. Blayden, United States Commissioner, at his office, at Boardman, Oregon, on the 28th day of April, 1922.

Claimant names as witnesses: J. R. Johnson, A. P. Ayers, Frank Otto, and Ingvard Skovbo, all of Boardman, Oregon.
