J. M. Glasgow and son, Gordon, of Hunters, Wash., surprised his brother, C. E. Glasgow Saturday night by motoring in at eleven o'clock at night. They woke up several farmers in the district before finding the Glasgow ranch and then only located him in the dark when they saw a light out in the field where Mr. Glasgow was spreading water with a shovel. Scientists Find Nothing New by Study But Will Continue Observations.

Washington, D. C.—Mars paid its annual visit to earth, but revealed none of its secrets. The giant telescope at the naval observatory here has been trained on the planet steadily for the last few days as it approached the earth, but Professor Asa Hall Jr., in charge of the observations, said that nothing not already known had been gleaned. The observations will be continued from here, however, as the planet recedes.

Professor Hall remarked that in 1924 Mars will approach to within 34,600,000 miles of the earth, and observers will have a better chance to study it than now, when the closest point of approach is about 42,000,000 miles away.

One thing that should have been mentioned was the old fashioned charivari when the people of the project gave the newly-weds a week or so ago. Almost everybody was there. Mr. and Mrs. Weston showed themselves to be good sports as they had a big freezer full of ice cream, bushels of lemonade, cigars and candy and the uninvited guests brought cakes so everybody had lots of eats and a good time. We wish to extend heartfelt congratulations to this couple and wish them many happy prosperous years of life together.

CHURCH BUILT BY ONE MAN

It is said that the wonderful cathedrals of Europe were constructed by laymen and skilled workers of the church. L. D. Cornuelle, formerly a Cincinnati man, built this elaborate edifice single-handed, filling the role of architect, mason and carpenter. He worked from a pencil sketch only and finished the work in a year and eight months. The church stands at Sierra Madre, California, and nestles in the foothills back of the little town.

Efforts will be made to interest the railroads in the use of such power, which would practically result in the success of the proposed enterprise.
