His Prettiest Girl Sues Congressman

THIS is Miss Anna Niebel, suing Representative Herrick, of Oklahoma, for \$10,000 heart balm. She charges breach of promise to marry. The suit comes as a result of the Congressman's beauty contest, held at the Tidal Basin, Washington, D.C. Anna was pronounced the best looking girl in the best looking bathing suit, winning a silver cup. She says she lost her heart, that the Congressman asked to marry her, but threw her aside.

FARM TOPICS

From Department of Industrial Journalism, O. A. C.

Get Rid of Lice on Hogs.

Lice on hogs can be easily destroyed by the use of smudge oil or the discarded oil drawn from the crank case of the automobile or tractor. It can be applied with a brush in the case of a few hogs or it can be used in connection with rubbing posts. This treatment destroys the lice but does not effect the eggs. It is therefore necessary to give a second treatment at the end of 12 to 14 days when the eggs are hatched. Experiments have shown that lice reduce the effectiveness of the feed as much as one third.

Codling Moths are Due

The new brood of codling moths are due. Worms will be appearing five to eight days after the appearance of the moths. From Lane county north, therefore, a codling moth spray should be applied July 20 to 30. From the number of worms already evident an August spray is almost inevitable. This probably will be due about August 21 or earlier. Many growers are using a spreader in all spray applications. The station is inclined to believe this advisable but considers the addition of the spreader particularly desirable and worth while in the August cover spray.

Oregon Poultry Meeting Big Affair

From 500 to 600 poultrymen of Oregon are expected at the state poultrymen's convention at the college August 1 to 3, according to A. G. Lunn, professor of poultry husbandry. Three speakers of international reputation—Prof. James R. Rice, head of poultry department at Cornell university; Dr. J. Raymond Beach, in charge of poultry disease investigations at the University of California and James Dryden, who by his breeding methods has made the northwest famous as an egg producing section will address the assembly. Professor Rice will discuss the world poultry situation and some phases of poultry farm management, and Dr. Beach will tell of California's work in assisting poultrymen to combat disease among the fowls. President W. J. Kerr of the college will address the visitors at the evening session August 2. Demonstrations of killing, picking, caponizing and culling will be given at the college poultry plant by members of the poultry department. Camping grounds are being provided for the visitors.

Crop Standardization Important

Standardization of crops is a variety and quality is vital to the welfare of Oregon, declares G. C. Hays, p. farm crop specialist of the Oregon experiment station. "Sixty three varieties of wheat are grown when 14 and possibly 11 would take care of all needs and give a better yield and quality. The discarding of many of the inferior varieties and standardization of those found best suited to Oregon conditions will bring an increased yield at practically no increase in cost." Twenty-five thousand acres of grain were inspected and passed as meeting certification requirements last year, reports Prof. Hayslop.

The Lure of the OCEAN BEACHES

was never more fascinating than now, because so much has been done to insure comfort and delightful recreation at all of the many resorts near the mouth of the Columbia River. You can plunge into the surf, dig clams, fish, hunt, play, rest and get the real joy that only a beach vacation can give. And you have this brilliant galaxy of beaches to choose from:
