**BRITISH ACTION IS
SURPRISE TO U. S.**

Washington, D. C.—The Washington government is not convinced there was any misconduct on the part of its two consular officers at Newcastle, England, who recently were deprived of their authority by British officials, and until a proper investigation has been made, no steps are to be taken to reopen the Newcastle consulate.

The action of the British authorities in suspending excoquators of the Americans, it was pointed out, automatically resulted in the closing of the consulate, and if inconvenience to British subjects has resulted, the responsibility for it does not fall upon Washington.

Officials here will not discuss the incident in detail, but it is apparent that cancellation of the excoquators came as a surprise, in view of the fact that the action was taken before the state department had completed its investigation into the British charge, that the Newcastle consul and vice-consul had improperly influenced travelers to patronize vessels of the United States shipping board in discrimination of British ships.

It was learned that President Harding has interested himself in the case, and while he recognizes that additional evidence may be produced as the investigations continue, he believes nothing has developed to the present time
