**Gives Antitoxin Forcibly to Cut Diphtheria**  
 Lebanon, Pa.—Having forcibly administered antitoxin to members of the faith tabernacle, a cult of faith healers, local health authorities are hopeful of checking the spread of diphtheria, which in three weeks has caused the deaths of nine persons. All the victims were members of families of the faith tabernacle and all, the authorities declared, had been denied medical attention.

**Five of the deaths** occurred in the family of Mrs. Charles Roth, her husband and four children dying since April 21. One of the children died while the funeral of another was being held. Mrs. Roth had refused medical treatment for her family. She and four surviving children were inoculated, although she would not give verbal consent, but submitted without protest.

**U. S. in Midst of Record Period in Road Building**  
 If proof were necessary that the United States, which, thanks to the development of the motor vehicle, is now passing through the most intensive period of highway development in the history of the world, is building roads that surpass in quality anything of the kind constructed since the days of the Roman empire, that proof is to be found in abundance.

It exists not only in the quality and quantity of American highways, but in the development of road building methods and materials. The road builders of this country have not only outstripped their ancient predecessors in the use of the most ancient materials, but are getting better results with greater speed, less labor and lower cost.

**Advantages to Farmers in Living on Good Road**  
 Living on a good highway with quick transportation the farmer is enabled to enter into the plans for the benefit of his village and of his community, to take part in the town meetings, to have a voice in the affairs of his district, to be helpful to his neighbors, to attend divine services on the Sabbath, to go to lectures, university extension courses and to aid in the organizations of those agencies that are helpful to the community and this meeting with his neighbors aids in the forming of co-operative associations that give him better marketing facilities and better prices for his products.

**Roads Bring Business**  
 Aniston must have good roads leading out into every community and every county from which her merchants draw trade. For two years Aniston's commercial organizations and Aniston's merchants have been energetically working to build up the country trade of this city, and the result has been gratifying. Despite the handicap of poor roads Aniston has extended its trade territory in every direction and now this city is the market for a greater number of people from this and other counties than at any previous time in its history.—Aniston Star.

**Regular Repairs Needed**  
 We have striking illustrations in Calhoun of the result when road maintenance is neglected, says the Aniston Star. Several roads in this county that were fairly good roads a year or two ago now are in very bad shape simply because they have not been kept in repair.

**Source of Succulence**  
 The dairyman needs a permanent source of succulence for summer feeding. Relying on blue grass pastures is often unsafe because dry spells soon burn them up. Such dry spells cause the cows to drop in milk production. Sweet clover offers an excellent pasture value to the dairyman. Sweet clover, preferably the white variety, stands up under drought conditions, grows abundantly, and does not cause bloat.

**CREAMERIES**  
 Buying activities of 308 creameries indicate that 29 per cent of the organization buy feeds, 25 per cent buy containers, and 22 per cent buy fuel. The complete list of commodities purchased by the various organizations include building material, fencing, hardware, implements, general merchandise, and miscellaneous products in addition to the commodities specifically enumerated.

**CREAM NEEDS GOOD CARE**  
 As hot weather approaches the cream must receive better care on the average farm. As soon after separating as possible, cool the cream by setting the can in cold water. Never mix the fresh cream with the cream from previous separation until cooled as low as possible. Do not keep cream too long at the farm. Poor state cream will not make good butter. If the creamery cannot make good butter the average price of cream will be lower than if good butter can be made.

# The DAIRY

**BETTER COWS QUITE ESSENTIAL IN DAIRY**

Dr. David Friday, formerly president of the Michigan State Agricultural college, recently pointed out a fact that is well known, but, like lots of well-known facts, seldom appreciated. The scrub dairyman gets 120,000 pounds of milk a year from 40 cows averaging 3,000 pounds each. He would be better off with 30 averaging 4,000 pounds each because he would get the same milk check with one-fourth less work and overhead. The better dairyman uses 15 cows producing 8,000 pounds each to get his milk check, while the really successful dairyman gets 120,000 pounds of milk from 12 cows averaging 10,000 pounds a year.

While the successful dairyman gets his 120,000 pounds from 12 cows instead of 40, thus cutting his overhead, labor and feed cost by nearly three-fourths, he has an added advantage which has recently been proved by the United States dairy division. The dairy division finds that cows producing 100 pounds of fat in a year made an average return above feed cost of \$10 each. Cows producing 400 pounds of fat in a year made an average return above feed cost of \$100. Thus it seems that it only took four times as great production to make the cow ten times more profitable.

With these figures in mind it is very easy to see why there are failures in the dairy business and why, also, there are such marked successes. The way to get and keep a profitable herd is to everlastingly weed out the culls, employ better methods by keeping up to date on the new feeds and methods that make greater profit and, lastly but by no means least, to use good, straight pure bred dairy bulls with production records back of them.—H. R. Lascelles, Fieldman for the Colorado Dairy Commissioner.

**Test Cream Separators, Is Advice of Expert**  
 Cream separators that have not been tested for some time may be cheating their owners out of a considerable sum every week. That can be avoided, for skim milk testing will reveal the honesty of the most delectable separator, according to C. A. Iverson of the Iowa state college.

"Surprising results have been obtained wherever fairly large numbers of hand separators have been tested," Mr. Iverson says. "In Worth county, five separators in one cow-testing association were found to be losing excessive amount of butterfat. We feel certain that there are many separators in every community that are losing butterfat for their owners. An annual loss of several dollars can easily result if the machine is not regulated or run properly.

Skim milk testing can be done by the Babcock method with a special double-necked test bottle. In place of the 17.5 cubic centimeters of acid required for whole milk, 20 are used for skim milk. Otherwise, practically the same procedure is followed as in testing whole milk. The test can be made by the farmers themselves, or, if this is not convenient, by the local creamery.

**Making Better Butter**  
 Whether the product is made at home or at the creamery, matters little, cream should be clean flavored to make good butter. To obtain practically all of the cream from the milk and have it in the best shape for butter making requires the use of a good cream separator. Further, the thorough cleaning and sterilizing of all dairy utensils is essential to the production of a product having a good flavor.

**Aid Dairy Community**  
 There are two means by which the dairy cow population of a community may be increased, by breeding through the use of pure bred bulls from proved ancestry, and by importing from other sections mature cows ready for service at the fall. In the latter case of purchase of cows, we have two alternatives—importing animals from other sections, and finding the animals within the state.

**Creamery Activities**  
 Buying activities of 308 creameries indicate that 29 per cent of the organization buy feeds, 25 per cent buy containers, and 22 per cent buy fuel. The complete list of commodities purchased by the various organizations include building material, fencing, hardware, implements, general merchandise, and miscellaneous products in addition to the commodities specifically enumerated.

**Regular Repairs Needed**  
 We have striking illustrations in Calhoun of the result when road maintenance is neglected, says the Aniston Star. Several roads in this county that were fairly good roads a year or two ago now are in very bad shape simply because they have not been kept in repair.

**Source of Succulence**  
 The dairyman needs a permanent source of succulence for summer feeding. Relying on blue grass pastures is often unsafe because dry spells soon burn them up. Such dry spells cause the cows to drop in milk production. Sweet clover offers an excellent pasture value to the dairyman. If the creamery cannot make good butter the average price of cream will be lower than if good butter can be made.

# STATE NEWS IN BRIEF.

**Salem.**—The state tax on sales of gasoline and distillate in Oregon during the month of April aggregated \$214,497.05, according to a statement prepared here by Sam A. Koser, secretary of state.

**Hillsboro.**—The Washington county and Oregon Pioneer association will have its annual meeting Sunday, June 29, in the city park here. Special exercises will be held in the auditorium and all pioneers and their descendants are urged to be present.

**The Dalles.**—A. L. (Jack) Weston, 55, was sentenced to the penitentiary for the remainder of his natural life by Judge Fred W. Weston, in the circuit court Saturday. Weston was convicted a week ago of the second-degree murder of Robert H. Krug near Sisters in 1919.

**Pendleton.**—Orders for tickets for the annual Pendleton Round-up have already started coming in, according to George O. Baer, business manager of the show. F. C. Norris of Appleton, Wash., recently ordered a box for the entire show, and other orders have been received.

**Salem.**—C. H. Gram, state labor commissioner, Saturday resumed taking testimony with relation to charges that his department had failed to enforce the state laws regulating the working hours of culinary employes and sanitary conditions existing in local restaurants.

**Eugene.**—C. A. Horton, public accountant, and John T. Evans, realty dealer, have been announced as recall candidates for school directors of Eugene to run against W. A. Elkins and Mrs. Roy Loomis, against whom a recall movement has been started. Their candidacies were announced Friday.

**Oceanside.**—Thus far this season the new Oceanside beach has been unusually active. Visitors have been attracted to the resort earlier this year than before, buildings are going up on many spots along the sea-coast town and the predictions are that the resort will enjoy a much better season this year.

**Salem.**—W. S. Birdwell, employed in the street department of the city, suffered a crushed leg and other injuries when he was run down by a steam roller while spreading gravel on a railroad crossing. Physicians said it probably would be several weeks before Mr. Birdwell regains the use of his leg.

**Salem.**—Several hundred residents of the country lying north of Salem staged a demonstration here Saturday with the presentation to the county court of a petition asking for a paved roadway connecting Brooks and Mount Angel and piercing part of the Lake Lahsh district. The petition contained 575 names.

**Pendleton.**—The time is coming when the Umatilla Indian reservation will be owned entirely by white people, according to the statement made by Major E. L. Swartzlander, superintendent of the agency, at a recent meeting of the Rotary club. He will leave next week for Portland, after having been here for 15 years.

**Hillsboro.**—A deer in the fields near Witchazel was the cause of excitement Saturday. When finally captured in the loganberry patch of F. H. Wilson, the deer put up quite a fight. Evidences show it to be a pet of someone as it showed no fear until Mr. Wilson tried to handle it. The state game warden has been notified.

**Pendleton.**—Rain which started falling Saturday afternoon continued until shortly before noon Sunday until a total of 0.85 of an inch had fallen, according to the weather report. Farmers and livestock men unite in declaring that the benefits of the precipitation can hardly be estimated, as it was the first general rain since early February.

**Salem.**—The single cottage plan in the construction of the proposed new state training school for boys was adopted by members of the state board of control at a special meeting held here Saturday. It was said this plan has the approval of L. M. Gilbert, superintendent of the institution, and practically all of the welfare workers of the state who have given it consideration.

**Salem.**—Dr. W. H. Lytle, state veterinarian, denies reports that have been circulated in Portland and other cities to the effect that there are several cases of foot and mouth disease in eastern Oregon. "These reports were unwarranted," said Dr. Lytle, "and probably were made out of whole cloth. There has not been one case of the foot and mouth disease in the state of Oregon, despite these rumors to the contrary."

# You Want a Good Position

Very well—Take the Accountancy & Business Management, Private Secretarial, Calculator, Comptometer, Stenographic, Penmanship, or Commercial Teachers' Course at

**Behrke-Walker**  
 The foremost Business College of the Northwest which has won more Accuracy Awards and Gold Medals than any other school in America. Send for our Success Catalog, Fourth Street near Morrison, Portland, Ore. Isaac M. Walker, President

**Bobbed Hair Losing Out.**  
 New York.—Bobbed hair is on the wane in England and knickers are looked upon with disfavor by girls, according to Miss Margaret Backhouse, head of the Campfire Girls in England, who has just arrived in this country to make a tour of summer schools in camping, conducted by Campfire Girls in all parts of the United States.

**On the Right Path.**  
 We stumble and falter and fall, but we are never lost if even once in a while we can set our eyes upward and outward and our feet on a path which leads us to work for man, for mankind, and not for ourselves. — Robert W. Bingham.

**Old Surgery Still Practiced.**  
 Two thousand five hundred years ago Hindus performed surgical operations for cataract by a method which still survives.

**F. M. Criteser**

**OREGONIANS, TAKE THIS MAN'S ADVICE!**

Portland, Oreg.—"Dr. Pierce's Golden Medical Discovery and Pleasant Pellets have given me a new lease on life. Several years ago I contracted the 'flu' and for weeks I was unable to leave my bed. My strength had all gone. I had a heavy cough and at times could hardly get my breath. My stomach went back on me and my bowels would not act naturally. I said, 'I suppose this will finish me.' I was asked by a friend to try Dr. Pierce's Golden Medical Discovery and Pleasant Pellets, as they had prolonged many lives. These medicines of Dr. Pierce's did wonders for me—I am now 82 years old, work every day and enjoy good health; in fact, I feel better and more fit than I did twenty years ago. Dr. Pierce's remedies have given me the privilege of enjoying a healthy old age."—F. M. Criteser, 892 Mallory Ave.

Go at once to your neighborhood drug store and get the Discovery in tablets or liquid, or send 10c to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for trial pkg.

**Or the Price the Owner Paid.**  
 It is astonishing how quickly the merit of a picture can be determined—after we know the artist's name.—Boston Transcript.

**Not Much New in Cotton Machines.**  
 Thousands of years before the invention of cotton machinery in Europe Hindus had cotton gins, spinning wheels and looms.

**Depth and Stillness.**  
 Clear writers, like clear fountains, do not seem so deep as they are: the turbid look the most profound.—Walter Savage Landor.

**Nowhere to Go but Home.**  
 "Mid pleasures and palaces though we may roam, they all close at last and we have to go home.—San Francisco Chronicle.

**Banana Leads Food Production.**  
 The banana produces more food to the acre than any other plant. Its yield is about fifty times more than the potato, and about one hundred and fifty times more than wheat.

**The Letter Q.**  
 The origin of the letter Q is interesting in view of its similarity to the letter O. The name is derived from the French word Queue, meaning tail, as the letter is O with a tail.

**Tip for Statesman.**  
 Lame ducks are inevitably by-products of popular government. But every statesman should have a trade.—Chicago Daily News.

**Foil Burglars 100 Years.**  
 For more than 100 years a famous firm in London has been inventing and manufacturing locks and safes to baffles burglars.

**Red Cross BALL BLUE**  
 is the finest product of its kind in the world. Every woman who has used it knows this statement to be true.

**P. N. U. No. 24, 1924**
