Mays Says Cancer Will be Controlled. Philadelphia, Pa.—Dr. Charles H. Mays, of Rochester, Minn., one of the country's leading surgeons, told the Philadelphia forum in an address that he believed cancer would be "under control" within a few years. By this Dr. Mays said he did not mean that cancer would be cured nor that it would be preventable, but that it would be more amenable to treatment and that its working would neither be so rapid nor so serious. He based this belief, he said, on the theory that cancer is caused by an organism, perhaps by a germ, and on the Wasserman test through which it is claimed the presence of cancer may be detected.

COURT TO DECIDE ON CAPITOL BONDS

Olympia, Wash.—At a meeting of the state capitol committee here a resolution was passed to issue \$500,000 of bonds against the state capitol timber, as authorized by recent legislative action. State Treasurer Potts met with the committee and offered to buy the half million issue at 4 1/2 per cent from accident funds in the treasury.

State Auditor Claussen, as a member of the committee, did not vote on the resolution, and when it came to signing the bonds as state auditor, refused to attach his signature. Attorney-General Dunbar will at once bring a mandamus proceeding in the supreme court compelling Claussen to sign the bonds. It is understood the supreme court will hear the matter and decide as soon as possible, that, in case the bond law is not held unconstitutional, work on the capitol may proceed.
