VOLUME V

BOARDMAN, MORROW COUNTY, OREGON FRIDAY AUGUST 28, 1925

NUMBER 35

GENERAL PATRICK

Major-General Patrick, who is to remain as chief of the army air service, according to a decision of the War Department.

WILL MARKET FEWER CATTLE THIS FALL

Washington, D. C.—The department of agriculture estimated that 250,000 fewer cattle will be marketed from the range country this fall than last fall, with the principal reduction in the southwest. The number for market is placed at 4,077,000 head, compared with 4,322,000 last fall and 4,208,000 in the fall of 1923.

Feed conditions over the range country are generally very good except in the southwest.

Excellent feed supplies in Idaho, Oregon, Washington and Utah will result in more cattle for market this winter than last year, with most of these cattle moving to coast markets.

MANGANESE IN OLYMPICS

U. S. Geologist After Extensive Survey Reports Plenty.

Aberdeen, Wash.—The Olympic peninsula is rich in deposits of manganese ore, according to J. T. Pardeen of the United States geological survey, who returned from an extensive investigation of mineral deposits in the Olympics.

Pardeen said that there are manganese traces throughout the mountains and that several vast bodies of the ore have been discovered. One of these deposits, on the Soudic burn, near Port Angeles, is already being mined and is yielding ore of exceptionally high grade.

"The manganese deposits of the Olympics have hardly been scratched," said Mr. Pardeen. "There are also traces of iron and copper in the high country."

More Wheat in the World.

Washington, D. C.—The department of agriculture reported that wheat production in 22 countries on August 19 was estimated at 2,222,000,000 bushels, against 2,156,000,000 bushels for the same countries last year. The countries, the department said, represented 72 per cent of the world crop outside of Russia and China.

Plane Wrecked Near Irrigon

There was some little excitement at our neighboring town last Saturday when an airplane which had been stalled there, was dragged out onto the highway and in starting to ascend the wing hit a telephone post and the plane turned over, tearing all the telegraph wires as it went and knocking down the pole, which tore the top from Salling's car. Fortunately no one was injured. The occupants of the plane took out the engine and departed in a car which was said, came from Walla Walla. Many stories were rife as to what the business of the plane was, many thought it was out to meet the escaped convicts, who were still at large, but at last reports all were as much in the dark as ever. The occupants of the plane were reticent and taciturn. The same day the Patterson Ferry was closely guarded by a number of men who were deputized to keep a watch for the convicts and it was a great relief when the news came telling of their capture in Washington.

Tourist travel is heavy and each night at the Warner Auto camp, numerous cars of all sizes, ages and descriptions are seen. Nine or Ninety, They All Like It

Members of the Centenarian club of Los Angeles, Cal., celebrated the other day the ninety-ninth birthday anniversary of Galusha M. Cole, president of the organization. This picture of C. M. Skillen, eighty-nine, and Frances E. Godfrey, shows that age has nothing to do with the taste for ice cream cones.

TELL US THE NEWS

Every week we fail to report some mighty interesting news items for the simple reason that we do not know anything about them, or cannot find out definitely enough about them. Please phone us, write us, or tell us about the little or big things that happen. Most anything that you find is worth while talking about would make an interesting item in the paper. We do the best we can to report all of the local news of interest, but remember that we are not mind readers, we do not meet the midnight trains, we cannot be everywhere at every time and get the paper printed—so You will be helping more than you realize by telling us the items you know, by tipping us off to what is going on in the community, and at the same time your help will mean a better livelier newspaper for yourself and everybody. —THANK YOU—

DIPPING INTO SCIENCE

Birds' Own Law

Many kinds of birds are said to hold court. For minor or grave offenses, the gull is called before a few, or a few hundred of his clan. The charges are poured out, and if the bird is exonerated, he is un-molested; if not, they all join in his execution. Many writers tell of having watched such trials and executions among crows, storks, rooks, sparrows, and flamingos. (© 1925, Western Newspaper Union)
