**READY FOR WORK!**  
The value of fire protection depends largely upon the readiness of the fireman to respond to any call and his willingness to face any danger. The value of fire insurance depends largely upon the readiness of the company in which you are insured to respond immediately to your loss and its ability to meet any loss which may come to it. That's the kind we have—always ready for work. They pay promptly every honest loss, big or little. Let us write your insurance and we'll give you the kind that WORKS ALL THE TIME.

## RECALLS SEEING MARTIN VAN BUREN

The passing of President Wilson through the country on his recent visit recalls to Henry Ballinger, a resident of Coeur d'Alene, Idaho, father of Mrs. Ella Oxford of this city, the recollection of the first president he ever saw. This was Martin Van Buren, the eighth president of the United States, when that gentleman was electioneering for office in 1836.

According to his statement Mr. Ballinger was engaged with his sister, two years older than he, in the serious child business of playing in puddle of water in their bare feet when they met Mr. Van Buren.

"It was near our home in Gullford county, N. C., that I saw Martin Van Buren," Mr. Ballinger stated. "My sister and I were playing in the water running from the watering spring when we saw two carriages coming down the 'big road,' as we called the main highway. In the first carriage was, as we afterwards learned, Martin Van Buren and a lady, whom I take it, was Mrs. Van Buren. In the second carriage was a man, whom I believe was the vice-presidential candidate. They stopped at the spring to water their horses, and Mr. Van Buren and the lady took great enjoyment in watching us paddle on the water in our bare feet."

Mr. Ballinger is 87 years of age and is as spry as a man of 45. He immigrated to Indiana in 1848, and saw the first engine come into Richmond and helped build the first railroad bridge across Whitewater river at that city. He went to Kansas Territory in 1855, was at Lawrence and took an active part in the border war. He has never smoked a cigarette, cigar, pipe or chewed tobacco, or drank a glass of beer, wine, rum, whisky or any intoxicant. It is one of his boasts that he was never sick in bed a day in his life.

## A Few Things Oregonians Should Keep in Mind

Oregon has more to boast about than apologize for—  
Few people stop to consider the many things in which Oregon excels. Pacific Coast states—in some instances all Western states and in other cases the entire United States. One-fifth of the standing timber of the United States is in Oregon—the variety of merchantable timber in commercial quantities probably exceeds any state in the Union. Sugar and yellow pine, red and yellow fir, spruce, redwood, Port Orford cedar are a few of the well known woods.

Forty per cent of the water power of this country is within the borders of these four Northwest states and only 5 per cent developed.

Oregon produced 10 per cent of the platinum used by the United States during the war.

The fame of Oregon fruits circles the world.

The reputation of our cheese extends to foreign countries.

Our shipbuilding record is a world's record in many respects. We were able and did obtain greater returns on labor output and money costs than any other shipbuilding state.

In the manufacture of cereals, Oregon equals any and surpasses all other states west of the Rocky mountains.

Oregon is the largest furniture manufacturing center in the entire West and in some special lines of furniture we stand third in the entire United States. Our markets extend to some of the Latin-American countries.

In saddlery manufacturing leads Pacific Coast states and carries trade to points far east and south and to foreign countries as well.

In the handling of agricultural implements Portland is the fourth city in the United States and is a way ahead of all western cities.

In the manufacture of wooleens, Oregon is away ahead of other western states. As a wool center, Portland is the second city in the country. In candy manufacturing Oregon is second to no other Pacific coast state.

Our cracker and macaroni plants take the lead in the West. The third largest seller of soda crackers in the United States is in Oregon.

The largest coppersmith plant in the entire United States is in Oregon.

The biggest broom factory west of the Mississippi river is in Oregon. The only carbon paper manufacturer west of Chicago is in Oregon. Our paper mills and stove foundries equal any to be found in the west.

company doing business in the state. In all of the West, Oregon is the principal seed state—flower and garden seeds here excel in greatest variety and finest quality. Seeds go from Oregon to the great seed houses of the East and are then sold back to Oregon dealers for use in Oregon gardens.

The supply of standing timber in Oregon is such that before long we will head the list of all states in lumber production and when attained it will be sustained for all future time.

In connection with lumber industry attention may be directed to the fact that when a big tree is once cut down, it is gone forever—its value is removed and does not come back—this does not apply to cereals and other food products that are continued and renewed from year to year as permanent industry.

No other state has such a wide area of fertile land uncrossed by railway lines as is represented in the great central Oregon country, an area nearly as large as the state of Ohio. Think of the possibilities of the future when the land is under full cultivation and served by carriers.

Excepting in California, Oregon spends more per capita for public highways than any other State.

Some of the largest undeveloped potash and mineral salt fields and lakes in the world are in Oregon.
