Our Profit from all Sources The American Public does not believe all it reads. It insists on being shown. When Swift & Company says its profits are only a fraction of a cent per pound, many believe we are not telling the whole story—that there are hidden profits. Here Are The Facts: Our net profit on our entire business for the year 1918 amounted to only 1.76 cents per dollar of sales, or less than one-half cent per pound, and 1. Included profits from hides and all other by-products. 2. Included profits from all sundry side-lines. 3. Included profits on all subsidiary corporations. 4. To sum up—it included the entire profit from every source of revenue in which Swift & Company has any interest. There are no other profits. Furthermore our accounts have been checked and certified annually by leading public accounting firms. Swift & Company is sincerely trying to get the facts before the public. If you have any questions regarding our business—write us—and we will do our best to answer them. In discussing the packing business be sure you have the facts and that you are not unintentionally spreading misinformation. If you get the facts we have no doubt as to the verdict.
