### Osteopath Scores Inspection System

At the meeting of the Southern Oregon Osteopathic association, held in Ashland the first of the week, Dr. T. J. Ruddy of Los Angeles, stated that "In the examination of children of school age, it is commonly found that they can be grouped in three classes: well, sick and mal-nourished.

"The average school inspection nurse, and in many cases, physicians, passed upon those who were sick and those who were well, wholly overlooking the poorly nourished group which constitutes 35 per cent of all children.

Under the present school system, all are compelled to meet the same requirements and progress at the same speed with the result that 33 out of every 100 children finish their common school education physically unfit, and this without the family physician and school instructor knowing why.

"If school inspection systems are to be more than farcical in guiding our future generation, something must be done more than looking at test charts, examining the throat and filling out blanks. Every organ and every activity of the mind must be tested for their function and surely nurses cannot be expected to do but a small part of this work."

### CHRISTMAS GIFT HOME PAPER

No more acceptable Christmas present than a year's subscription to the old home paper for friends who have moved away can be made for the same money, says the O. A. C. press service. Unlike most other friends it never forgets to write, but 52 times a year it spreads a feast of news, rich in memory-stirring items that form the best possible substitute to a visit "back home." Call on or write the editor today," advises the college editor.

**Inside Facts**  
It's what's inside your battery that makes it live long or wear out quickly.  
Inferior insulation wears out before the plates do, and re-insulation is necessary.  
Threading Rubber Insulation eliminates the need of re-insulation, makes a battery last much longer under equal conditions, and reduces the liability to any other kind of repairs.  
It's the one biggest battery improvement in ten years—demonstrated now by four years of use.  
You can't afford not to know about it, for some day you'll need a new battery.  
Call and let us tell you all about it.
