posed in cases where conviction has been had on charges of homicide in any degree; rape, where violence is an element of the crime; robbery of any kind; burglary, when armed with a dangerous weapon, and assault with intent to kill while being armed with a dangerous weapon. There can be no palliation of such offenses, and I would have the word go forth that Oregon will in the future meet such offenses with a flat penalty that will be carried out to the end." The only mitigation I would suggest would be to allow the deduction from the total sentence of a reasonable number of days for good conduct, but this deduction should be nominal and not such a deduction as to make any decidedly appreciable reduction in the sentence.

Governor Olcott said it would be his pleasure to submit to the legislature the resolution of the American congress for amending the federal constitution so as to extend the right of suffrage to the women of the nation.

"I am certain," added the governor, "you will not deem it presumptuous if I express the hope that you give your unanimous approval to the ratification of this amendment."

SALEM, Jan. 12.—Each house, shortly after the special session of the legislature convened today unanimously passed a joint resolution ratifying federal suffrage. A fight is now on to see which will win the honor of having its resolution adopted by both houses.

So anxious were the senators to place themselves on record in favor

of the amendment that many of them yelled "aye" before the reading clerk could call their names. Mrs. Thompson introduced the resolution before the house adopted it. Speaker Jones giving her recognition over the others wanting the honor.

Announcing the LIGHT SIX MAIBOHM

We Have Been Exceedingly Fortunate in Securing the Agency for the

Lightest of Good Sixes

Four years ago Maibohm saw the handwriting on the wall. The inevitable coming of the light-weight, fast, comfortable car became the ideal of Maibohm design. Now, with the buying public awakened to the value of less pounds, less fuel use, less vibration, more power, speed and getaway, Maibohm has a proved car, ready for the demand—proved through four years' intensive design, testing and use under every imaginable condition.

The Result of An Ideal

The result of Maibohm's strict adherence to an ideal has indeed brought about a remarkable motor car. In every phase of performance this unusual light six compares deed for deed, with the large, costly cars which have been accepted by motorists as representative of perfection in automobile performance.

Filtered into the success Maibohm has attained in four years of making motor cars is the invaluable experience of more than a quarter-century of unflinching reputation as a maker of fine carriages.

A Wonderful New Factory

Maibohm cars come to you out of a factory of the highest order of efficiency. The men who build the chassis and the body, who inspect every phase of the construction—every man in this huge plant is a happy contented workman, doing his job in flooding sunlight and fresh air.

Pledged to maintain a more than quarter-century-old reputation; producing in a wonderful new factory, under ideal labor conditions—Maibohm is bound to build fine motor cars.

WE HAVE A CAR LOAD JUST IN

The Light Six Maibohm is a new car in this territory. To our notion it is the gem of them all. It is nothing less than a sensation in construction, economy, durability and price.

COME AND SEE IT. DEMONSTRATION GLADLY GIVEN
