Good Implements Are Always Good Bargains!

You Will Need Them To Help You Solve Your Problems Next Season.

You could turn the soil into a seed bed with a spade; you could plant and cultivate with a hoe; you could harvest with a sickle, thresh with a flail, and carry your grain to market in a sack.

You could perform all of those operations at slight cost for the implements used.

But it wouldn't pay. Not in this day and age. You couldn't produce the surplus that makes modern farming a real business.

You couldn't operate your farm at a profit per bushel, per ton, or per acre.

Good implements—plenty of them to meet your requirements—enable you to make the best of conditions as they come.

They multiply your farming power, enable you to take good advantage of favorable weather, increase your yields and cut your cost of production.

You can't afford to do without needed implements, nor can you afford to use inferior implements.

Our service makes it easy for you to get good implements. You can come to our store—take full advantage of our stock, study the implements, get fully acquainted with their every feature, and buy judiciously.

That way of buying will help you get the most from the year that is coming.

Drop in the next time you are in town and see our stock.
