SOUTHERN PACIFIC SERVES NOTICE OF WAGE REDUCTION

The Southern Pacific Company, through General Manager J. H. Dyer, has served notice on employees in train, engine and telegraph services, of a proposed reduction in wages of 20 per cent and for employees in yard service approximating 15 per cent. Representatives of these employees are being requested to join in conference June 4 to consider the company's proposals.

"We are compelled" to take this action," said Dyer, "as is the case with other roads, owing to the situation that confronts the railroads and in accordance with the changing industrial conditions and the general downward trend of prices." There are approximately 8000 employees on the Southern Pacific Company's Pacific System who are affected by the proposed reduction. Drafts of new rules covering conditions to take the place of those included in the old National Agreements to be abrogated July 1 according to the Railroad Labor Board decision of April 14, 1921, have been exchanged by the Southern Pacific Company with representatives of the railway clerks and with representatives of the stationary engineers, firemen and others. Further conferences will be held later in the month at which time the proposed rules will be more fully discussed. Under the old National Agreements the same rules applied to all railroads despite a wide variance in local conditions. The new rules will be formulated by the individual roads with their employees.

FACTS AND FIGURES

A Current Review of Trade, Finance and Industry Throughout the World

There are 54 kinds of paper money in circulation in this country, ranging in denomination from \$1 to \$10,000 notes.

A consignment of gold coins nearly \$5,000,000, mostly in marks, recently arrived in this country from Germany. This is the first shipment of gold since the war.

There are in the United States 15,000 miles of inland waterways, 18,000 miles of interurban electric tracks, 205,000 miles of railroads, and 2,250,000 miles of highways.

Potatoes are selling for 18 cents a bushel on the markets in Aravers City, Mich. The low price is due to the fact that thousands of farmers have held for higher prices since last fall.

Joseph G. Cannon, former speaker of the house of representatives, went to work in 1850 at the age of 14. His first job was clerk in a grocery store, where he earned \$1.50 a week.

Telephone connections are now made for spoken conversations between Catalina Islands, in the Pacific ocean and Cuba, via the United States. The distance covered is 5700 miles.

According to price data in possession of the secretary of labor, mid-dlemen are now levying a total of 21 per cent on the value of all foods and most necessities used throughout the United States.

While there are no coins of the precious metals in circulation in Germany, paper money in existence amounts to 105 billion marks, and that in circulation amounts to more than 80 billion, as against 50 billion in circulation in 1919.

A shipment of 744 milk cows and three pedigree bulls recently left Baltimore for Hamburg, Germany. The consignment, which will be distributed among dairymen in that country, represents a gift from a dairy company in Chicago.

UNDIES IN TINTS

Many Shades Are in Demand for the Lingerie Sets. Prominent Dressmakers and Designers Put Forth Almost Limitless Number of Models. If the conservative woman of fashion has paid any attention to the trend toward colored underwear during the last few years she has had many surprises, notes a Paris fashion correspondent. To those who would never dream of using any material but fine white linen for their lingerie the increasing use of underclothes of the most perishable materials of every color under the sun comes as a bit of a shock. There is, however, a tremendous demand for these things. If there were not, the best designers and the greatest dressmakers would not spend their valuable time in putting forth an almost limitless number of models embodying ideas of this sort.

In a recent trousseau Mme. Jenny of Paris made lingerie sets in pale orange, light mauve and pearl gray crepe de chine. She used no embroidery or hemstitching, but narrow baby ribbons of the same tone were threaded through all the edges. An amusing note was the fluted frills which edged the bottoms of the collars and also extended up the sides to the hip line. Every piece was embroidered with the wearer's monogram in the same tone. There is a great vogue in Paris at the present time for monograms designed by well-known decorative artists. Lauvin shows a nightgown of pink crepe de chine embroidered in silver, having a deep plaited yoke and plaited sleeves. On the left shoulder is an embroidered motif of flowers in the French national colors. Another fanciful Lauvin model is a nightgown of dark orange crepe de chine with high collar and long sleeves drawn into a tight band at the wrist. This gown buttons down the left side from the top of the collar to the waistline. Very fantastic in design and color are the new lingerie sets of triple voile or colored linen or those of white men trimmed with color. Or they may be of linen in a solid color with the garniture in a contrasting shade.

WRONGGUESS Didn't you say before we were married, that we'd get along like a pair of turtle doves? I should have said "an appin' turtles."

A SLAM My dog knows as much as I do. How odd you are! Most men brag about their dogs.

Not Fond of History. Looking up from his history lesson, Bobby said: "Mother, I do wish I'd been born in the time of Julius Caesar."

"Why?" asked his mother. "Cos then I shouldn't have to learn everything that's happened since."

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead—How to Make Good

By JESSIE ROBERTS

THE WOMAN DOCTOR

IT WAS not so long ago that the woman doctor was held more or less in contempt. She was supposed to be a freak, to put it clearly, and it was only freaks who would go to her for treatment.

It is still a surprise when you hear a college girl say that she is studying medicine. It will become less and less so as prejudice fades and as more and more women enter the field. There are nowhere near enough good doctors and in the constantly extending work of preventive medicine women will find the fullest opportunity. It is there, more even than with children and with women, that woman will do her greatest medical labor. Preventive medicine is only in its infancy. Those who know say that it will soon see an immense extension. The lessons of the war have been of tremendous value in teaching what may be expected, and even these are but fore-shadows.

The woman who has a taste for medicine and who can give the necessary time to its study is preparing a fine future for herself. The day is over when the intellectual woman went into teaching as the one most interesting profession open to her. The woman doctor is already on her way. In a few years she will be known as commonly as her brother, and as favorably. No woman who feels drawn to the work should hesitate to follow it, if she can by any means accomplish the training required.
