What Constitutes Advertising?
 In order to allay a misunderstanding among some as to what constitutes news and what advertising, we print this very simple rule which is used by newspapers to differentiate between them: "ALL future events, where an admission charge is made or a collection is taken IS ADVERTISING." This applies to organizations and societies of every kind as well as to individuals.
 All reports of such activities after they have occurred is news.
 All coming social or organization meetings of societies where no money contribution is solicited, initiation charged, or collection taken IS NEWS.
 We make all quotations on **JOB WORK** from **THE FRANKLIN PRICE LIST.** Same prices—Reasonable Price—to all.
 Entered at the Ashland, Oregon, Postoffice as Second Class Mail Matter.

HAZ KIK REGULAR FEATURE
 Haz Kik is a new discovery. We didn't know he was in town. We have arranged with him to write us a regular signed feature every day dealing with local and interesting topics. His droll philosophy on the local things that are will prove interesting. He will have no criticism on anybody or anything, but will likely make some suggestions on many things. He says he would rather say how he would do it, or how he wouldn't do it, rather than criticize others. He says he wants to be constructive, not destructive, that he wants to live and die with good feeling toward everyone, therefore he will refrain from saying ill of anyone. He says he just wants to tell folks how he would do it if he had the chance. Watch for HAZ KIK; he will appear on the front page of the Tidings every day, unless he gets inoculated with the grouch. In that case we will quickly kill him. There should be no law against putting a grouch out of the way.

SUGAR-COATED PILLS
 WISDOM
 From "Aesop's Film Fables"
 —By Aesop, Jr.—

THE FOX AND THE FLATTERY
 Flattery is like fly paper; once you get stuck on it, you have a tough time tearing from it.
 Those who sing with "mouthful" risk losing toothsome eats.
 Assault and battery do no more harm than an ounce of flattery.
 Sixteen ounces of flattery equal a full pound of truth.
 Too much flattery will extinguish a bright career.
 As ye "fall" for flattery, shall ye tumble with no little rumble.
 'Tis a foxy fellow who can get "Old Crow" nowadays, or even nowdays.
 A little flattery now and then is liked by women, and also by men.—"Aesop's Film Fables."

Government to Distribute Explosive; Stump Clearing

PORTLAND, Or., Aug. 26.—A great impetus will be given the clearing of logged-off and burned-off lands of the state through the use of a large amount of picric acid which the government has made available for the land-owner, according to a statement issued by Charles Hall of Klamath Falls, president of the Oregon State Chamber of Commerce, following the recent notification from Washington that Oregon has been allotted 192,000 pounds of this explosive.

According to government bulletins, picric acid is of greater strength than dynamite and is safer to handle. It is an explosive which was used in the great war, and with a great surplus on hand at the conclusion of the war, the government decided to turn it over to the different states on a basis of the amount of logged-off land in each state.

Land owners of the state must place their orders for the picric acid with the Oregon Agricultural college, according to advices from Washington. When the number of orders equals a carload, the Agricultural college will forward this order to

the United States department of agriculture, and the explosive will be shipped to the state from the nearest cartridding plant. Individual orders will be limited to 1000 pounds, and the total cost of the explosive, including the cost of cartridding, handling, distributing and freight, will be in the neighborhood of 13 cents per pound.

"The state chamber has been following developments closely in regard to the distribution of picric acid," said Mr. Hall. "We believe that the cheapness and efficiency of this explosive will give a great impetus to land-clearing operations in Oregon. The total cost of picric acid to the consumer is much lower than commercial explosives at the present market price, and a great demand for the government explosive should come from some of our districts where the bulk of the undeveloped lands are logged-off and burned-off."

"Taken in conjunction with the logged-off land bill which was passed by the last legislature, I believe that the use of picric acid will mean much to the development of the state."

SECRETARY FALL AND PARTY MAKE ASHLAND VISIT

Albert B. Fall, secretary of the interior, and Stephen T. Mather, director of national parks, were in Ashland Wednesday evening enroute to Portland, from a tour of inspection of Crater Lake and Klamath reclamation projects. They were accompanied by Vice President McCormick of the Southern Pacific railroad.

"Crater Lake is unique, something different, and must be seen to be appreciated," said Secretary Fall. "But the thing to do is to link it up with Diamond lake and other wonder spots, so as to hold the tourist more than a day. An artist might study the colors in the water, and the skies for weeks, but the average man wants a change. Crater Lake ought to be the feeder to all the points of interest within twenty-five miles, and that is what will have to be done sooner or later. The people are beginning more and more to appreciate the national parks. Everybody can't go to Europe. Anyone who can drive an auto can visit these spots."

Government to Aid
 "As you know," said Secretary Fall, just before he entered Vice President McCormick's private car, "we are pretty hard up for money just now, but we will go the limit in the development of Crater Lake when we get on our feet again."

Secretary Fall and party were driven through Lithia park and then to the depot.
 "There is as pretty a park as I ever set my eyes on," commented the secretary after the trip.
 "I have enjoyed every minute of my visit to Crater Lake, and hope to come again some day," said the secretary.

but had always stayed in the republican columns in presidential years. During the trip to Ashland, Mr. Mather conferred with Seely V. Hall, in charge of transportation to Crater Lake, and joined the party when they passed through at 7 o'clock.
 E. O. McCormick, vice president of the Southern Pacific, whose guest the distinguished visitors were, during their trip through the northwest, was enthusiastic about the visits and inspections.

Diamond Lake Visited
 "We rode into the Diamond lake country, and what a wonderful trip that is," said Mr. McCormick. "It is an ideal side trip from Crater Lake, a marvelous ride through the woods, and a novelty to an easterner. I know Europe, and I know America, and if any other spot on earth has as many attractions to the square mile as this section, I want them to show it to me. Here in Southern Oregon is a climate that is different from all the rest."

Vice President McCormick favors the development of all the scenic attractions in Southern Oregon, Lithia Park at Ashland, the Natural Caves of Josephine county, and the lakes and wonders tributary to Crater Lake.

In connection with the remarks of Secretary Fall and Vice President McCormick, relative to the development of Crater Lake side attractions, it will be recalled that a week ago the forest service began an inspection of the recreational possibilities of Diamond lake, Lake O' Woods, Dead Indian Springs and Onion Creek. It is highly probable that Diamond Lake will be included in the Crater Lake national park at an early date in furtherance of this plan.

Secretary Fall will return to Washington, D. C., in ten days. After a short stay in the northwest he will visit irrigation projects in Utah, and personally go over the devastated districts of Pueblo, Colo.
