SEVEN ARE KILLED IN MINGO MINE WAR

WILL DEDICATE PIONEER BLDG. NEXT MONTH

SOUTHERN OREGON PIONEERS WILL DEDICATE BUTLER LOG CABIN IN SEPTEMBER—MEMORIAL TABLET NOW BEING

Jackson County Stockmen Will Meet Sept. 1st

A meeting of interest to the stockmen of Jackson county will be held in the public library, Medford, September 1, at 7:30. Prof. Potter, of the Oregon Agricultural college, will be there and desires to meet as many of the stockmen as possible, and at the evening meetings will discuss "New Methods of Fattening Cattle," and "Feeds for Wintering Cattle."

H. A. Lindgren, field man in animal husbandry, will discuss features of the marketing situations affecting the stockmen. It is hoped that a good turnout will be present, as both Mr. Potter and Mr. Lindgren will have something of interest to every stockman in the valley.

IRRIGATION PROJECT WILL BE COMPLETED BY MAY 31, 1922

Fourteen thousand acres of Rogue river valley lands will have water running over them within the next six months. The irrigation system now being put in by Patrick Welch, Spokane capitalist, at a cost of \$1,250,000, will be completed May 31 of next year, in time to be of service for next year's crop. Approximately 52 per cent of the acreage to be served is fruit orchards. It is believed that the water being put on the land will result in the present crop output being doubled.

The above are some of the salient features in connection with the irrigation project being installed here at this time. Why irrigation has never been established in the valley before, either by the national government or private capital, is hard to understand. It is well known that little rain falls here during the summer season, and although excellent crops are raised without irrigation, especially fruit, it is nevertheless true that irrigation is badly needed.

The present project was put under construction in January of the present year. The Medford irrigation district was organized, comprising 10,000 acres that was bonded for \$1,250,000. Patrick Welch of Spokane bought the bonds and paid cash for them. He bought them at one per cent below par and they carry an interest rate of six per cent. Mr. Welch then turned around and took the contract to construct the system for a price of \$1,000,000. The cost, therefore, is to be at the rate of \$125 per acre. There is an extra 4000 acres that will receive the water, but the owners of that area are not in the irrigation organization and will pay a cash rental for whatever water they get.

Fish Lake Source of Supply

The source of water supply for this project is about forty-two miles northeast of the city of Medford. Fish lake has been tapped by an outlet that runs the water into the north fork of the Little Butte creek and brings it sixteen miles down the mountain. In addition to Fish lake the supply has been augmented by digging a canal from Four Mile lake which is four miles further east of Fish lake and higher up in the mountains.

This permits the water from Four Mile lake to empty into Fish lake and provides a supply that will always be abundant.

Sixteen miles this side of the source of supply the water is picked up from the creek and taken into a pipe line that brings it about sixteen miles further at the rate of ninety cubic feet per second. From this point it is diverted into a fork and one goes around one side of the

Trainmen Brotherhood Start Vote on Wage Slice

OLCOTT HEAD OF STATE GUARD TO PRESERVE SCENERY

SALEM, Or., Aug. 27.—The Scenic Preservation Association of Oregon, perfected a temporary organization at a conference held in the office of Governor Olcott. Governor Olcott was elected temporary president, and Harold C. Jones of Portland, temporary secretary. The activities of the organization will be state-wide.

The object of the association as outlined at the conference will be to conserve the state's scenic resources and preserve the natural beauty along the state's highways. Primarily, the activities of the association will be in the interests of attracting tourists to Oregon.

Included among the men who attended the conference were Governor Olcott, Fred Kiser, J. H. Rankin, L. A. Nelson, George Cecil, E. S. Collins, John B. Yeon, all of Portland; Herbert Nunn, state highway engineer; F. A. Elliott, state forester, and T. E. McCroskey, manager of the Salem Commercial club.

Clubs and organizations represented at the conference were Portland Kiwanis club, Portland Ad club, Portland Chamber of Commerce, Portland Realty board, Salem Commercial club, state highway commission and United States forestry service.

The temporary executive committee will be composed of the Portland men who attended the conference. This committee will draw up the by-laws which will be presented and approved at a future meeting of the organization. Governor Olcott was instructed to issue a request for all civic and commercial bodies of the state to name scenic preservation committees. These committees in turn will assemble in their respective cities and each select a representative who shall be recommended to the governor for appointment as a vice president of the state association. Another meeting of the association will be called by the governor at an early date.

Haz Kik

The other day, what purported to be a newspaper, was thrown in my yard, and I picked it up and glanced it over. Evidently it was edited by New Yorkers, endorsed by a big department store, printed in Medford and named Ashland. But the thing that first caught my eye was that it was a FIVE page paper. The first one of the kind I had ever seen. The only way a five page paper can be made on a printing press is to leave one page blank. After perusing the volumes of personal venom in it I concluded it was a wise thing after all, because the best use to which such a paper can be put would require at least one clean, white, sanitary sheet. Saying nothing about the squareness of taking a whole page of paid hunting advertising and running it through only part of the edition.

HAZ KIK.

Chicago Masonic Temple Robbed; Quarter Million

CHICAGO, Ill., Aug. 29.—Five men are held here in connection with the looting of the Security safety deposit vaults in the Masonic Temple here of upwards of \$250,000. Two of the men held are guards in the vaults, as detectives believe the robbery was the result of an "inside" plot.

FEDERATED CRAFTS VOTE WALKOUT IF DEMANDS FAIL

CHICAGO, Ill., Aug. 29.—The Brotherhood of Railway Trainmen is the first of the "big four" railroad union organizations to start a test of the workers' sentiment on the question of whether or not they will accept the new wage scale or walk out. A strike vote of all railroad men was started to be taken today following a request by the union leaders for a complete vote. Ballots have already been sent out to members of the trainmen's union.

Five hundred thousand members of the Federated Shop Crafts have already voted to walk out if their demand is not met. The trainmen's organization number about 150,000.

Accused Woman Murderer Taken To Knoxville, Tenn.

TACOMA, Wash., Aug. 29.—Mrs. William Stubbs, who, as Mude Moore, was convicted of the murder of LeRoy Harth, wealthy Knoxville, Tenn., automobile dealer, and escaped while out on a \$10,000 bond, started for Knoxville today for a second trial. She hopes to be acquitted of the charge. William Stubbs, her husband, will go to Knoxville and aid his wife as soon as he can dispose of his hotel property.

Newcomers Locate on B Street

Charles Christian and family have recently moved into the Harrison house on B street. This family recently arrived here from St. Louis and express themselves as finding Ashland quite to their liking.

Silver Tea at Christian Church

The missionary ladies will have a silver tea at the Christian church Wednesday afternoon at 2:30. A short program and refreshments are to be the features of the afternoon.

Aashland Bride Of Two Months Dies at Seattle

The body of Miss Fern Specht, 19, wife of H. E. Specht, employe of the Southern Pacific company, arrived in Ashland this morning from Seattle, Wash., where the bride of two months died August 25, while visiting her mother-in-law in that city. The Stock Undertaking parlors assumed charge of the body. Mr. Specht stated this morning that the funeral would be held Wednesday afternoon, the time to be announced later.

Mrs. Specht was formerly Miss Fern Keeton, daughter of Mr. and Mrs. W. J. Keeton who live on a ranch about one mile south of Ashland. Miss Keeton was educated in the local schools. Besides her husband and parents she is survived by a sister, Miss Lydia Keeton. Mr. and Mrs. Specht were married in Ashland June 29, at the home of Rev. Charles A. Edwards, pastor of the Methodist church. The couple departed the same day on the honeymoon which terminated so suddenly with the death of Mrs. Specht.

START SEARCH FOR 'DUD' WOLGAMOTT AND BOOZE CARGO

E. S. Sandifer, special agent for Oregon, and four deputies who conducted a series of raids in Jackson county last week, departed Thursday and spent Friday in Roseburg. Sandifer carries with him a warrant for the arrest of Ernest S. (Dud) Wolgamott, who, he informed the Roseburg News-Review, is headed for Southern Oregon in an auto, with eighteen cases of "pure Canadian whiskey." Deputies are looking for Wolgamott and his alleged cargo, and a systematic search will be made to the northern border. During his stay in the county, Sandifer refused to admit that a warrant had been issued for Wolgamott, who was absent from his accustomed haunts two days before the raids started. Friends of the young man stated that he is deer hunting in the wilds of northern California, between Yreka and the coast.

Sandifer alleges that Canadian booze is being transported into Oregon in large quantities and that he will devote all his energies and forces to putting a stop to it. Among the contraband bottles of liquor seized in Medford, alleged to have been sold by John Goodwin, a taxi driver, was the "Canadian Club" brand. The special agent who secured it, drank half of it up, before it appeared as evidence in the justice court.

According to the authorities there are five more warrants to be served in connection with the recent raids. The net results of the raids, the expense of which are borne by Jackson county, were jail sentences and fines to Barney Dufur, James Stone and Isaac Coffman, the first a farmer of the Kane's creek district, and the last named farmers of the Applegate, who pleaded guilty to owning illicit stills. James Edwards and John Goodwin, local taxi drivers, and Wilbur (Wig) Jacks, of Eagle Point, were bound over to the grand jury on charges of selling intoxicating liquor. Besides the above results, a good sized scare was thrown into the local dispensing profession.

Although no further arrests for several days have been made in the campaign by the special state agents to rid Jackson county of bootleggers and moonshine stills, new sensations along this line are looked for almost hourly. The governor's special agents are still at work in

STATE OFFICERS MAKE FEEBLE EFFORTS TO COPE

FIGHTING BREAKS OUT EARLY SUNDAY MORNING—STATE OFFICERS MAKE "FEEBLE ATTEMPTS" TO STOP MINERS—PREPARE FOR FIERCE FIGHT

LOGAN, W. Va., Aug. 29.—Fighting between the miners protesting against the state of martial law in Mingo county, and the state officers broke out early Sunday morning. Seven deputies are held captive by the miners, seven have been killed, thirteen men and one woman have been wounded, according to an estimate made following Saturday night's fighting.

The fight Sunday morning lasted only a few minutes, after which both sides retired, preparing for a fierce battle today.

It was thought on Friday of last week that the belligerent miners had been finally halted in their march to Mingo county, when C. F. Kenney, president of the United Mine Workers of America, induced 500 or 600 armed miners to return to their homes. At the same time that Kenney made his plea to the men a citizens' posse of 1000 armed men were stationed in a mountain pass on the Logan county line guarding the road with machine guns, ready to fight the oncoming miners.

WASHINGTON, D. C., Aug. 29.—General Bandholtz, who investigated conditions in the Mingo county coal mine area in West Virginia, reported to Secretary of War Weeks today that state officers had made only "feeble attempts" to cope with the labor disorders in the mine district.

Authorities Want Northwest Data On C. W. French

CHICAGO, Ill., Aug. 29.—Federal officers investigating the alleged \$50,000,000 swindling operations of Charles W. French, have asked authorities in the northwest to seek information regarding French's alleged financial operations in this section during the last few years, and also his connection with any recent operations of suspected irregular character.

Telegraph Briefs

WASHINGTON, D. C., Aug. 29.—Dr. Joseph Linville, Carlton, Oregon, was appointed today as federal prohibition director for Oregon. He will have his headquarters at Portland.

ROSEBURG, Or., Aug. 29.—The grand jury is being impelled to dispose of the Brumfield case. It is expected to return an indictment by Wednesday of next week. The jury went into session at 10:15 o'clock this morning. Dr. Brumfield did not appear for a hearing.

BELFAST, Aug. 29.—At least three persons are known to have been wounded when heavy rioting broke out here today. Bombs and revolvers were freely used. An armored car detachment, dispatched to the scene, quelled the rioters after a short skirmish.

SAN FRANCISCO, Calif., Aug. 29.—Following are today's market quotations on poultry products: Eggs, 44. Hens, 25 @ 27. Broilers, 32 @ 35.

Trigonia Well Shows Good Signs Result of Tests

During the week C. E. Vau Ostrand, physical geologist of the United States geological survey, made tests of the temperatures of the Trigonia well.

The government has for some time been experimenting in the petroleum fields with tests of this character, and while the value of such tests as a basis for determining the presence of petroleum is somewhat problematical, the terminal readings will very accurately determine the character of the formation penetrated.

Basaltic formations, always barren of petroleum, show a much higher temperature than do the petroleum producing sedimentary formations.

The temperatures in the Trigonia ranged from 60 degrees Fahrenheit at the top, to a fraction above 70 at a point where the under reaming is in progress.

These readings and gradations conform to those of the proven oil fields, and are corroborative of the showing the well has made in both oil and gas. It does not mean that oil will be discovered in the well, but merely that thermal conditions conform to those of producing areas.

Reaming the hole has proceeded through the week without interruption, and is proving a difficult and trying task.
